County Clerk/Registrar of Voters (CC/ROV) Memorandum #13090

TO: All County Clerks/Registrars of Voters

FROM: /s/ Jennie Bretschneider
Assistant Chief Deputy and Counsel

RE: Voter Registration: Procedure for Providing Address Corrections to
USPS

County election management systems (EMS) use United States Postal Service Coding Accuracy Support System Certified ("USPS CASS Certified") software, such as ZP4 or Accumail, to verify the accuracy of voter addresses submitted both on paper and via the California Online Voter Registration (COVR) system.

In some rare instances, the USPS data and the CASS Certified software system data regarding the county where an address is located is inaccurate. Errors typically occur along county boundary lines, but can also occur for other reasons.

When a county elections official identifies an error, the following procedure should be followed to correct the error in the USPS official address database to ensure the voter is registered at the correct address in the correct county:

- 1) Contact the planning department in the jurisdiction where the address is located. For addresses with city boundaries, contact the city planning department. For addresses in unincorporated areas, contact the county planning department.
- 2) Ask the planning department to prepare a letter on planning department letterhead confirming the error and requesting a correction.
- 3) Send the planning department's letter to the USPS Address Management System (AMS) district in which the address is located. Please refer to the attached spreadsheet of California zip codes and corresponding AMS district managers and contact information.

You may wish to follow up with the manager of the responsible USPS AMS district to ensure the correction was received and for information on when the USPS database will be updated.

CA Zip to County
