### *Acknowledgements*

*The researchers would like to sincerely thank the county elections officials and staff throughout the State of California who took time to provide data to the project. Additionally, we are grateful to the Secretary of State's Office for its continuing support and interest in this project. Without their assistance, the completion of these yearly reviews and the California Elections Data Archive would not be possible.*

# CALIFORNIA ELECTIONS DATA ARCHIVE

## INTRODUCTION

The California Elections Data Archive (CEDA) is a joint project of the Center for California Studies and the Institute for Social Research, of California State University, Sacramento and the office of the California Secretary of State. The purpose of CEDA is to provide researchers, citizens, public agencies and other interested parties with a single repository of local election data. With over 6,000 local jurisdictions in California, the task of monitoring local elections is nearly impossible for individuals. CEDA addresses this problem through the creation of a single, cost-effective and easily accessible source of local election data. CEDA includes both candidate and ballot measure results for county, city, community college, and school district elections throughout the State. CEDA thus represents the only comprehensive repository of local election results in California and one of a very few such databases on local elections in the U.S.

### **How the CEDA Data is Collected and Reported**

Election data are collected periodically throughout each calendar year. This enables CEDA to incorporate results from special elections as well as all regularly scheduled elections. Election results from counties, cities, and community college and school districts are entered in the CEDA database from which three standard CEDA reports are generated. These reports include:

- County Elections: Candidates, ballot designations, and vote totals for all elected county offices; vote totals and text for county ballot measures.
- City Elections: Candidates, ballot designations, and vote totals for all elected city offices; vote totals and text for all city ballot measures.
- Community College and School District Elections: Candidates, ballot designations, and vote totals for all elective community college and school district offices; vote totals and text for all district ballot measures.

Ballot measures for all jurisdictions are coded according to type (e.g., charter amendment, taxes, bond measure, initiative, etc.) and to topic (e.g., education, public safety, governance, etc.).

## **THE CEDA PARTNERSHIP**

### **THE CENTER FOR CALIFORNIA STUDIES**

Located at California State University, Sacramento, the Center for California Studies is a public policy, public service and curricular support unit of the California State University. The Center's location in the state Capital and its ability to draw upon the resources of the entire State University system give it a unique capacity for making contributions to public policy development and the public life of California. Center programs cover four broad areas: administration of the nationally known Assembly, Senate, Executive, and Judicial Administration Fellowship Programs; university-state government liaison and applied policy research; civic education and community service through forums, conferences and issue dialogues; and curricular support activity in the interdisciplinary field of California Studies.

### **INSTITUTE FOR SOCIAL RESEARCH**

Established in 1989, the Institute for Social Research (ISR) is a multidisciplinary institute that is committed to advancing the understanding of the social world through applied research. The Institute offers research expertise and technical assistance serving as a resource to agencies, organizations, the University and the broader community. Services provided by the Institute include research and sampling design, measurement, coding and data entry, computer assisted telephone and field interviewing, mailed and Internet surveys, focus groups, data base management, statistical analysis and report production. ISR has completed numerous projects with more than 50 federal, state and community agencies, several private firms and many administrative units of the university. Faculty affiliates of the Institute offer specific content expertise in a wide variety of disciplines, including the social sciences, health and human services, engineering and education.

### **CALIFORNIA SECRETARY OF STATE**

The Secretary of State is, among other duties, California's chief elections officer with the responsibility of administering the provisions of the Elections Code. The Secretary must compile state election returns and issue certificates of election to winning candidates; compile the returns and certify the results of initiative and referendum elections; certify acts delayed by referendum, and prepare and file a statement of vote. Recent legislation permits but does not mandate that the Secretary of State compile local election results.

## TRENDS IN LOCAL ELECTIONS: 1995-2007

CEDA now encompasses thirteen (13) years of election data, including three gubernatorial election years (1998, 2002 and 2006), four statewide elections (1996, 2000, 2004, and 2006) and six odd-numbered years devoted to local races. This report begins with an overview of some of the multi-year election trends then continues to a discussion of the 2007 contests.

### BALLOT MEASURES

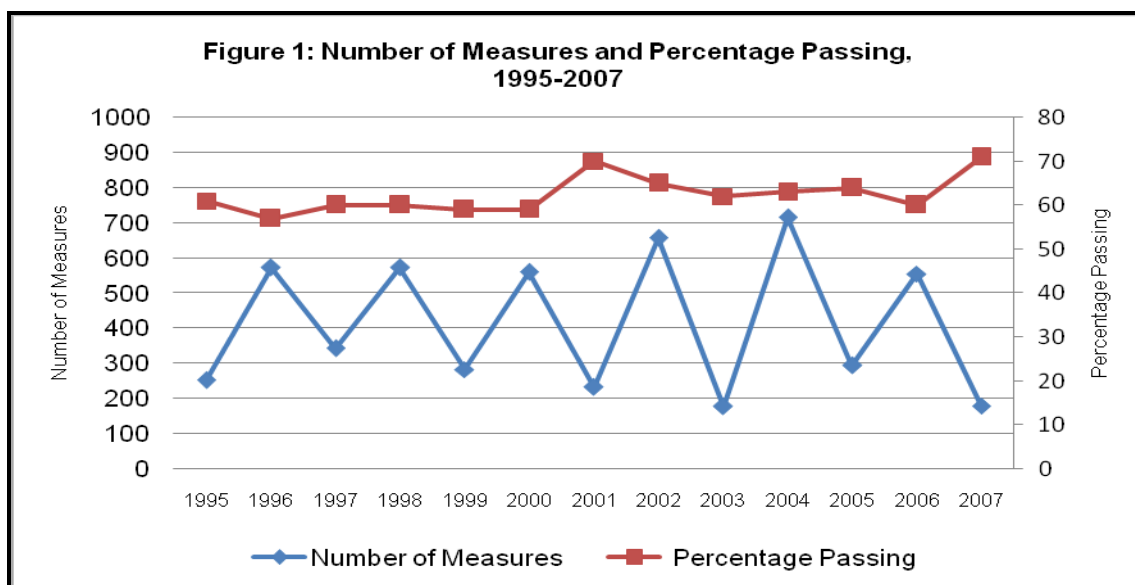

Each year, California voters are asked to consider a number of governance issues and to choose among candidates vying for public office. At all local election levels, there appear to be a number of consistent features across elections, while other election characteristics seem to vary considerably from year to year, particularly between on and off year election cycles. The following section discusses the patterns and trends over the 13 years of CEDA data collection.

#### Trends in the Number, Types, and Topics of Local Election Measures

- The number of local ballot measures offered to voters clearly seems to “piggy-back” on state and national elections. From 1995 through 2007 there were, on average, 415 ballot measures per year. In even number years, the average was 605 measures, while odd years average 252. During the 13-year period, 62% of all the ballot measures passed. In odd years, when a smaller number of measures are on ballots, the percentage of measures passed was slightly larger (63%) (See Trend Table A).
  - Among all the various types of ballots measures, *charter amendments* had the largest percentage of measures passed, with more than three-quarters (76%) of *charter amendment* measures passing during the 13-year period. The type of measure with the second best success was *recalls* with slightly more than two-thirds (68%) passing. However, it should be noted that this type had a small number of actual measures compared with some of the other categories. In terms of passage rates, following recalls were *bonds* (64%), *ordinances* (60%), *taxes* (51%), and *initiatives* (46%), respectively (See Trend Table A).
- Across the three governments levels—county, city and school district—at which data is collected, the largest average yearly number of ballot measures were seen at the city level (205; 49%), followed by the school district (140; 34%) and county (70; 17%). However, within these levels, the school districts had the largest percentage of measures passing (65%), followed by city (58%) and county (56%) (See Trend Table A).
- Interestingly, taken in total, 2007 saw the second fewest number of election measures, 179, since the collection of CEDA data was started. In fact, only 2003 had a smaller number of local election measures with 178, one less than the 2007 election year.
- Among the eight topic areas for local ballot measures, most commonly address education issues, with 34% of all measures between 1995 and 2007 focused on this topic. The number of such propositions has exceeded the number of measures dealing with other specific topics in all but two years, 1996 and again in the most recent 2007 election year. Interestingly, the 2007 year saw the education measures comprise its smallest proportion (23%) of all measures since the 1996 election (15%). In these two years, there were more governance than education measures.

- Prior to the 2007 election year, education measures appeared to have stabilized as a percentage of the total number of measures—slightly more than a third (33%-38%)—despite the large variation in the actual number of measures between odd and even year elections. At this point, it is uncertain whether the lesser 2007 proportion of measures targeted on education was an anomaly similar to the 1996 election, or whether a new trend is emerging. However, the proportion of education measures is clearly tied to the proportion of all measures that are school district measures, as school district ballot measures focus almost exclusively on education measures. To illustrate, during the 13-year period, 98 percent of school district measures were on the topic of education. By contrast, city level measures, which accounted for the highest total annual average of ballot measures (205), focused across the board on governance, land use, public safety, public facilities, general services and transportation, but had only 19 education measures during the entire 13-year period (See Trend Table B). From this, we may conclude that if school district measures drop off substantially as a portion of all local measures, then the dominance of education issues is likely to fade as well.
- Since CEDA starting tracking revenue as a separate topic area in 2000, this topic has represented approximately 11 percent of the total ballot measures in local elections. Among all county measures, revenue issues accounted for about 11 percent; but among city's measures, revenue accounted for about 19 percent of the issues. As only six revenue issues were at the school district level in the 13-year period, percentages for its portion of the school measures have little meaning.
- Figure 1 provides an overview of the number of ballot measures and the percent of measures passing in each of the 13 years of data. As can be seen in the blue trend line in Figure 1, the actual number of ballot initiatives vary substantially between odd and even years, but as can also be seen in the red trend line, the percentage of ballot measures passing remains fairly constant (See Figure 1).
  - Overall, 62 percent of ballot measures passed and the pass rates held fairly constant in even year elections (61% passing rate) and in odd years (63% passing rate) (See Trend Table A).

- Figure 2 provides an overview of the average (mean) number of local ballot measures and the percent of those measures that passed in each of eight topic areas for the past 13 years (1995-2007). As discussed previously, ballot issues dealing with education and governance displayed the largest overall average number of measures, but also revealed the highest average passing rate among the eight topic areas (See Figure 2).

\*Revenue data has only been collected as a separate topic since 2000.

- The level of ballot measures also appeared to have little overall impact on the passing rate for various measures. County measures had the lowest passing rate at 56 percent overall, with school district measures having the best passing rate about ten percent better than county measures at 65 percent (See Trend Table B).
- County measures showed the greatest disparity in passing rates between odd and even year elections, faring much better in odd year elections. For example, county elections witnessed a 19 better passing rate for *tax* propositions, a 33 percent better passing rate for *recall* measures, a 23 percent better passing rate for *bond* proposals, and a 22 percent better passing rate for *initiatives* in odd as opposed to even year elections (See Trend Table A).
- Among the six types of ballot measures identified in the CEDA data, *charter amendments* and *recalls* had the highest pass rates, 76 percent and 68 percent respectively, while *initiatives* and *taxes* had the lowest pass rates with 46 percent and 51 percent (Again, see Trend Table A).

## Trends in Bond and Tax Measures

- *Bonds* and *tax* measures each made up about 27% of the measures, totally just over half (54%) of all ballot measures over the 13 years of election results tracked by CEDA. *Ordinances* and *charter amendments*, affecting policy shifts in local government, constituted another 35%. *Initiatives* and *recalls* accounted for only 6% of the total local ballot measures (See Trend Table A).
  - School districts remain responsible for the vast majority of the *bonds* placed before voters—about 92% over 13 years of data collection. This is not surprising given the fact that bonds made up approximately 73% of the six types of measures in school district elections.
  - *Tax* measures are more dispersed, with a majority sponsored by cities (57%). Slightly less than a quarter (24%) is accounted for by counties, while less than one-fifth (18%) of local tax measures had their origin in local school districts (See Trend Table A).
- In the 13 years that CEDA has been collecting data, bond measures had much higher rates of passage than did tax measures. The average pass rate for bonds was 64%, while the pass rate for taxes during the period was only 51% (See Trend Table A).
  - Another trend observed during the 13-year data collection is that pass rates for tax measures are consistently higher in odd-numbered years than in even-numbered years—an average of 59% in odd years compared with 47% for the even-numbered years. As noted above with regard to general pass rates, counties saw the biggest differences between pass rates for taxes in odd versus even years, with an average pass rate of 57% in odd years and 38% in even years. The discrepancy for odd and even years was less for cities, with an average 59% pass rate in odd years and a 51% pass rate in even years. School districts also have a slightly better chance of passage of tax measures in odd than in even years—a pass rate for tax measures in odd years of 60 percent and of 55 percent in even years (See Trend Table A).
  - On the other hand, on average, pass rates for bond measures appear better in even-numbered years than in odd-numbered years (66% vs. 60% respectively). However, while bond measures are more likely to pass in even years versus odd years for cities (63% versus 54%) and in school districts (67% vs. 60%); they are more likely to pass in odd numbered years rather than even years for counties (73% vs. 50% respectively) (See Trend Table A).

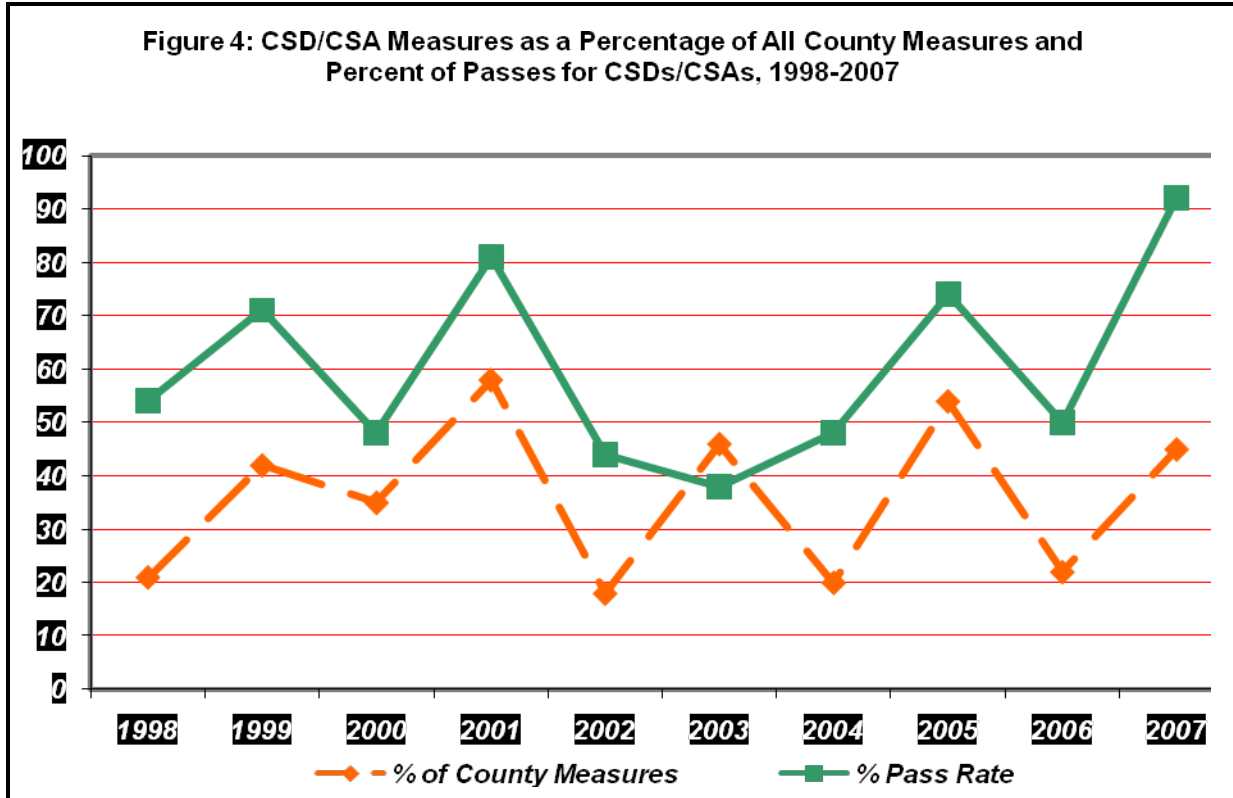

## Trends in Community Services Districts and County Service Areas Measures

Community Service Districts (CSDs) and County Service Areas (CSAs) were introduced just before the turn of the new century as an accommodation to the tax restrictions posed by Proposition 13. Portions of a county could form a special district and agree to tax themselves to provide services that the population as a whole might not support. CEDA began tracking community service district ballot measures in 1998. Despite considerable fluctuation in the number of CSD/CSA measures during the subsequent 10-year period, speculation that the number would increase over time is not supported by the trend data (see the dashed trendline in Figure 3 below). As seen in Figure 3, while the number of measures (represented by the solid line) increased dramatically from 1999 to 2000

and again in the 2003 through 2005 periods, the number experienced an equally sharp decline from 2000 to 2003 and again from 2005 through the current year of data collection. These increases and decreases are beginning to show a cyclical pattern with substantial increases followed by nullifying decreases. However, across these cycles, there appears to be a slight downward trend (again see the dashed line in Figure 3) can be seen in the yearly number of measures.

- As discussed in previous trend summaries, one important question is whether CSD/CSA measures lose effectiveness in terms of their passage rate as they become a larger percentage of all county measures. This year's data seems to add even further evidence that this is not the case. Although the 2003 election seems to be an anomaly in this regard, other years of data collection, particularly the last four, suggest that as CSD/CSA measures increase or decrease as a percentage of all county measures, their passage rate sees a corresponding increase or decrease. That is, when the percentage of county measures that are CSD/CSA oriented increases, their passage rate also increases and when they decrease, their passage rate also decreases (See Figure 4 below).
- In the ten years of CEDA data on CSD/CSA elections (since 1998), 225 ballot measures have dealt with these CSD/CSA issues in 35 different counties. However, the use of CSD/CSA measures varied widely among these counties. Six counties accounted for nearly two-thirds (64%) of CSD/CSA-related measures—Contra Costa (16), El Dorado (37), Kern (16), Marin (30), San Diego (26) and San Luis Obispo (20). By contrast, 25 counties have had 5 or fewer CSD/CSA measures on their ballots over the 10-year period (See Trend Table C).

- In the 10 years since their inception, the principal type of CSD/CSA measure has involved taxes (157; 70%). Interestingly, another funding mechanism, bond measures, has only appeared as CSD/CSA proposals five times (about 2% of the total measures). Behind taxes, Ordinances (21; 9%) and Gann Limit issues (20; 9%) were a distant second and third in terms of prevalence on the ballot. Recalls (10), Bond measures (5) and Advisory measures (4) together accounted for less than ten percent of the total number of measures during the 10-year period (See Trend Table D).

  - Overall, CSD/CSA-related tax measures were passed slightly less than one-half (47%) of the time. As with other tax related ballot measures, CSD/CSA measures in this area were more apt to pass in the odd-year elections (61%) and more apt to fail in even years (42%). CSDs/CSAs do slightly better than counties in passing tax measure (47% versus 42% respectively). On the other hand, cities do slightly better than CSDs/CSAs, passing 50% of their tax measures, while school districts enjoy the greatest success with these measures with a 58% percent passage rate (See Trend Tables A & D).
- With the addition of the 2007 election year data, when we separate out CSD/CSA measures from all county measures, we see that non-CSD/CSA measures had a slightly smaller percentage of measures passing, (57 percent) than did CSD/CSA measures with a 59 percent passing rate. However, CSDs/CSAs did much better than other county measures when the ballot measure involved taxes. County tax measures that are non-CSD/CSA related had a 38 percent pass rate, while CDS/CSA tax measures enjoyed a 48 percent passage rate (See Trend Table E).

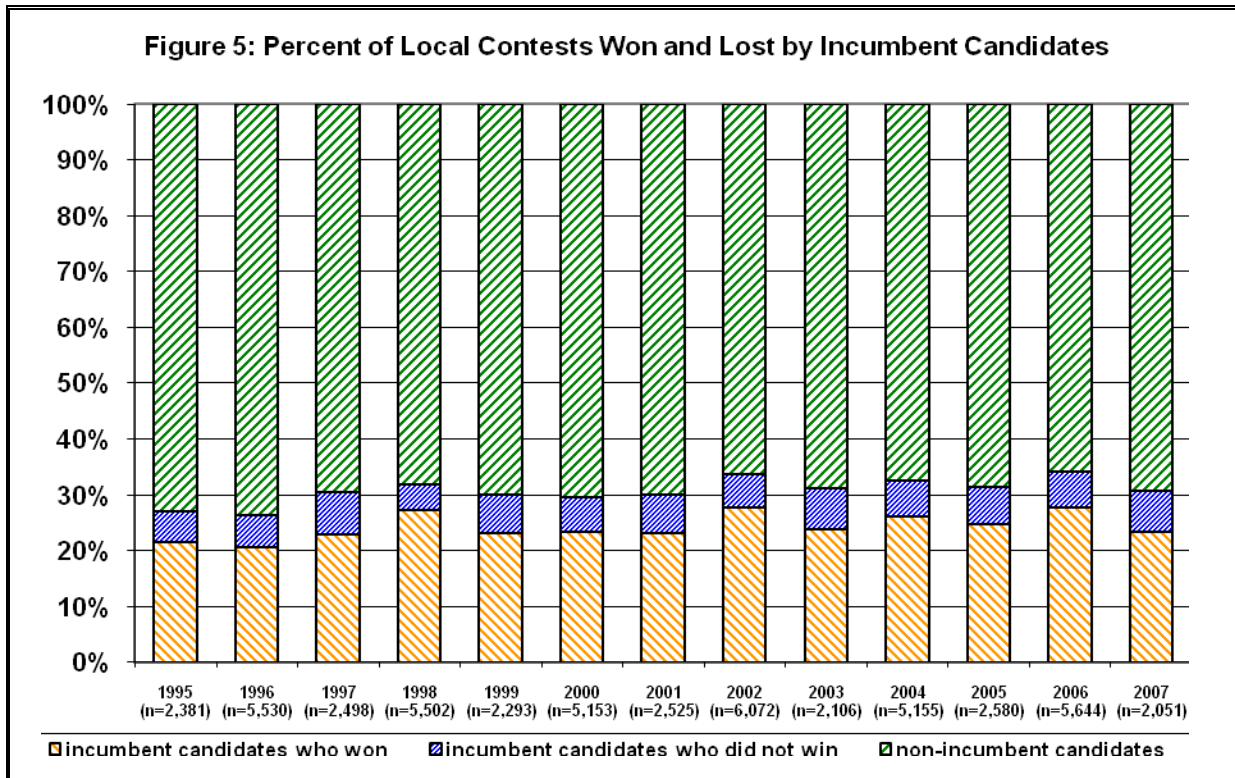

- Public safety remains the most common focus of CSD/CSA measures (71 of the 225 measures; 32%). General Services (30) is the second most prevalent ballot measure, followed closely by Governance (29). Following these three are Transportation (26) Public Facilities (25), Revenue (17), Environment (6) and Land Use (4) measures respectively.
  - It is interesting to note that there were no Governance or Public Facility or Land Use measures for two years after tracking of CSDs/CSAs was initiated in 1998, but Governance has appeared as a CSD/CSA issue in every election since then, and Public Facilities measures have appeared in all but one (2003). By contrast, Land Use, which also did not appear as CSD/CSA measures in 1998, has only appeared in two elections, 2000 and 2005. Also interesting is the fact that three Environmental measures appeared in the first two years of CSD/CSA initiatives (1998 & 1999) but have not appeared since (See Trend Table F).

## TRENDS REGARDING CANDIDATES

During the 13 years of CEDA tracking of local office elections, stable patterns have emerged with regard to the number of candidates seeking offices, and distribution of candidates across the various local offices that are tracked.

- The total number of candidates for local offices (county boards of supervisors, other county offices, city councils, and local school boards) is consistently over twice as high in even-numbered than in odd-numbered years (See Trend Table G).
- In the 13 years of CEDA data collection, school district candidates have comprised just under one half (48%) of all candidates for local offices. Candidates for city offices make up about 37 percent of the local candidates, while the smallest percentage of local election candidates reflects those seeking county offices (about 15%).
  - Off-year elections are dominated by school district candidates. With the exception of the 2005 and the recent 2007 elections, they make up about two-thirds of the candidates (between 62% and 69% of all candidates) on the ballot. In 2005, the percentage of school district candidates dropped to 55 percent and in 2007 the percentage dropped to 49 percent.
  - In on-year elections, the ratios between county candidates, city candidates and school district candidates become more balanced. Although there are many more school board races in even-numbered years, these candidates make up less than half of all candidates (40% to 46%) when the majority of county and city races take place (See Trend Table G). In two of the even year elections, 2000 and 2004, there was a slightly greater percentage of city candidates (43% respectively) than of school district candidates (40% respectively).
  - The percentage of candidates running for county offices “pops” upward on on-cycle election years. For example, in 1998, 2002 and 2006, the county candidates averaged 22 percent of all local election candidates; however, during the other 10 years of data collection, the county candidates comprised only nine percent of all the candidates.

- On average, during the 13 years of CEDA data collection, slightly less than one-third (about 31%) of all candidates for local offices were incumbents.
  - About 33 percent of those seeking school district seats were incumbents.
  - Approximately 25 percent of those seeking city council positions were incumbents.
  - About 25 percent of those seeking county supervisor seats were incumbents (See Trend Table I).
  
- Nearly four out of every five (79%) incumbents running for local reelection win their respective offices (See Figure 5 and Trend Table I).
  - Seventy-seven (77%) percent of incumbent school district candidates win their elections.
  - About 79 percent of incumbent city council office holders win their elections.
  - About 81 percent of those running for county supervisor<sup>1</sup> seats held the office (See Trend Table I).
  
- In local elections, during the past 13 years, a little more than half (52%) of winning candidates are incumbents. This means that the local political area is seeing a fresh mixture of individuals comprising local elected offices and bodies with each election cycle. Conversely, this also suggests that fears of control of these institutions by a group of long-term political incumbents may be overstated.

<sup>1</sup> This percentage is calculated on those years in which county supervisors were normally up for election. In off years there were either no candidates or a very small number running for vacated seats.

## 2007 ELECTION DATA

### BALLOT MEASURES

A total of 179 ballot measures were on local election ballots in 2007 of which 127 or 71 percent were enacted. The popular misconception that all ballot measures are a result of citizen initiatives was, once again, undercut by the data. In 2007 only a single ballot measure was placed on the ballot through the initiative process and it failed. The other 178 measures were placed on the ballot by the actions of county boards of supervisors, city councils and school boards.

The most notable developments in local ballot measures in 2007 were the striking decline in bond measures and the equally striking popularity of tax measures.

Since 1995, the mean number of bond measures at odd-number years is 71 with a 60 percent pass rate. In 2005, local voters faced 57 separate bond measures totaling more than \$6 trillion of which 75 percent were approved. In contrast, during 2007, there were only 22 county, city and school district bonds totaling of only \$1.894 billion. The voters approved only 55 percent, turning down ten measures totaling \$532.4 million. Both in the number of bonds and the pass rates, 2007 ranks (with 2003) as the second worst for bonds since 1995.

Although CEDA Reports represent the collection and reporting of election data and not a thorough analysis of those results, the dramatic decline in the number and passage of local bond measures in 2007 is intriguing. In 2006, Californians turned down both state bond measures on the June primary ballot but approved four such measures in November for a 67 percent pass rate. At the local level, 59 percent passed of the 184 total bond measures; the second highest total of measures since 1995. Hence, there is no clear pattern of decline that would explain the 2007 data. It is possible that the passage since 2002 of 482 bond measures worth trillions of dollars have satiated the demand and/or capacity of local government bonds. It is also possible that the weakened state and national economies as well as tighter credit markets have lessened the attractiveness of bonds as a mechanism of local government finance.

Tax measures at county, city and school district levels were dramatically successful in 2007. A total of 61 tax measures faced local voters who approved 45 or 74 percent. This is the highest pass rate for tax measures since 1995. Indeed, the average number of tax measures in odd numbered years since 1995 is 69 with a pass rate of 59 percent.

Conventional political wisdom in California is that voters are tax-phobic and proposals to create or increase taxes are non-starters. The data does not confirm conventional wisdom.

City voters passed judgment on a total of 40 tax measures and approved 29 (73 percent). The successful measures included:

- Four new parcel taxes (California City, Clayton, Monrovia & Ceres)—two parcel tax increases and two parcel tax extensions;
- Four sales tax increases (Selma, Delano, Hollister & Ceres);
- Four extensions of utility taxes and one utility tax increase (South Pasadena);
- Two occupancy or hotel tax increases (Desert Hot Springs & Palo Alto); and
- The City of Long Beach increased its oil production tax.

Voters approved seven measures *reducing* telecommunications utilities user taxes, as well as rejecting:

- Three sale tax increases;
- Two parcel taxes (one new, one extension);
- One utility and one water tax extension; and,
- One occupancy/hotel tax increase.

Voters in Rancho Palos Verdes also rejected an effort to repeal the city's storm drain user fee.

School districts placed 18 tax measures on their ballots of which 14 passed and four failed. All measures pertained to parcel taxes. One new parcel tax was created (Mammoth Unified in Mono County), one increased (Las Lomitas Elementary in San Mateo County), and 12 parcel taxes were extended.

At the county level, there were only three tax measures, two were approved by the voters and one was rejected: Calaveras County rejected a parcel tax in the Bar XX service area while Contra Costa approved a new parcel tax for the Port Costa area and Marin increased the parcel tax for dredging.

Finally, there were a total of 13 recall measures in 2007 and all succeeded. This 100 percent success rate has only occurred on one other occasion (2000) since 1995. The recalls of 2007 were also noteworthy for the large numbers of members in a single governing body being recalled. For example, three members of the Mortara Circle Community Services District (El Dorado County) were recalled as were four of five members of the Lynnwood City Council and all five members of the Potero Community Planning Group (San Diego County). The latter had all voted to approve a large training facility for Blackwater Security.

**County Measures.** Voters in only eight of California's 58 counties (including the City and County of San Francisco) passed judgment on 29 ballot measures of which 22 passed for a pass rate of 76 percent. The pass rate is the highest since 1995 but the total number of measures was the third lowest in odd-numbered years since 1995. In 2005, in contrast, county voters faced 57 ballot measures and approved 63 percent.

Most county measures were ordinances (16 or 55 percent), recalls (8 or 28 percent). There were three tax measures (see above), one bond, and one Gann Limit measure. Topics covered by the county measures included governance issues (14 or 48 percent of all county measures); facilities (5 or 17 percent) and land use (5 or 17 percent). It is interesting to note that all five land use measures failed, including four measures in Monterey County. Monterey County voters both refused to ratify a General Plan adopted by the County Board of Supervisors and rejected a measure to repeal that General Plan.

**City Measures.** A total of 108 ballot measures faced voters in 57 different cities, from Los Angeles to Ceres. Those voters approved 77, rejected 31 for an overall pass rate of 71 percent, the highest since 1995.

Most city measures were tax measures (40 or 37 percent), charter amendments (38 or 35 percent), or ordinances (19 or 18 percent). The most common topics of ballot measures were governance issues (49 or 45 percent), revenue measures (31 or 29 percent) and land use (13 or 12 percent). Land use measures had mixed results with 54 percent passing and 46 percent failing. Not surprisingly, measures affecting public safety had a 100 percent pass rate.

Of particular note were measures in Burbank, Long Beach, Sunnyvale and Pacific Grove. Collectively, the cities accounted for almost a third of all municipal measures. Burbank rejected an increase in its hotel tax as well as three measures seeking to make elective positions appointed. Long Beach voters were faced with eight measures that would have significantly altered the structure of city government. Voters opted to increase the tax on oil production and give the mayor new powers, including a line-item budget veto, but rejected a modification of term limits and an independent commission to set elected officials salaries. Pacific Grove had nine measures of which six cleaned-up the city charter. Finally, Sunnyvale with 11 measures addressed nine changes in the city charter, including a measure repealing an unconstitutional requirement that the city manager reside in Sunnyvale and enacting a provision “strongly encouraging” the city manager to do so.

**School District Measures.** California school and community college districts generated only 42 ballot measures of which 28 were enacted for a pass rate of 67 percent. This is, by far, the lowest number of school district measures since 1995; the previous low being 61 in 2003.

School districts placed on the ballot the fewest bond measures since 1995 (19 of which 11 or 58 percent passed) and one of the smallest total bond offerings (\$1.7 billion of which \$1.3 billion was approved). In contrast, in 2005 voters faced 52 school bond measures and approved 42 or 77 percent representing \$6 trillion dollars.

Tax measures represented 43 percent of all school district measures, or 18 of 42. Voters approved 14 or 78 percent, the second highest approval rating for tax measures since 1995. As noted above, all these tax measures were parcel tax extensions, or increases plus one school district established a parcel tax.

It is interesting to note that for the first time in the 13 full years of CEDA data, not a single member of a school board faced a recall election. The average since 1995 has been seven recall elections per year.

## CANDIDATE ELECTIONS

A total of 2,051 Californians heeded the call of public service and sought local elective office in 2007. This is the lowest number since 1995, the next lowest being 2,106 in 2003. A total of 207 Californians sought county offices (including community service districts/areas CSD/CSAs), 833 sought city offices and 1,011 school district office. These elections filled a total of 972 local offices, including 100 county offices (95 of which were CSD/CSAs); 357 city offices; and 515 school district offices.

As in 2005 and 2006, the data for 2007 clearly show that high incumbent reelection rates do not mean that boards of supervisors, city councils, school districts and other elective positions are in the grip of an entrenched incumbent class. Reality is far different. Re-election rates only show the success of incumbents who opt to seek reelection. Such data do not indicate the turnover among elected officials; i.e., when the electoral dust clears, how many non-incumbents were elected. To illustrate, on a five member city council, there could be a 100 percent incumbent reelection rate not because five incumbents were reelected but because the two incumbents who chose to run again were elected while the other three opted not to run and were replaced by newcomers.

**County Races.** A total of 100 Californians were elected to county offices in 2007. County offices sought included 95 CSD director positions, one county supervisor, two district attorneys, one sheriff and one mayor (in the city-county of San Francisco). The number of those seeking county office is always small in odd numbered years as most counties hold elections in even-numbered years. The 2007 candidates, however, represented the second highest number of county office candidates in an odd numbered year since 1995, a function of the increase in CSDs.

Of the 100 winners in 2007, 52 were incumbents who enjoyed a 69 percent reelection rate but represented only 36 percent of winning candidates. Incumbent sheriffs and district attorneys were generally successful in retaining office but directors of community service districts were far less successful. CSD incumbents had a reelection rate of only 67 percent but of all CSD directors elected only 35 percent were incumbents with 33 percent of incumbents having been defeated.

**City Races.** Given the form of general law and many charter cities in California, it is not surprising that the majority of candidates for municipal offices ran for city council. Indeed, of the 833 candidates, 727 were city council candidates. There were also 43 candidates for mayoral positions, 34 for city clerk, 26 for city treasurer, and three for city attorney. The total number of candidates for city offices in 2007 was 833, about average for odd-numbered years.

The winners in city council elections included 153 incumbents and 141 non-incumbents. Incumbents enjoyed a 78 percent reelection rate but represented only 52 percent of winners. On the other hand, incumbent mayors posted an 89 percent reelection rate and represented 76 percent of the winners. Incumbent city attorneys and clerks enjoyed even higher reelection rates (100 percent) but incumbents represented 50 percent of winning city attorneys and 68 percent for city clerks.

**School Board Races.** A total of 1,011 Californians ran for school board trustee positions in 2007. In contrast to county and city elections, the total is lower than expected and, indeed, is the lowest since 1995. Of these candidates, only 330 or 33 percent were incumbents of who 246 won for an incumbent reelection rate of 75 percent. But the majority of people elected to school boards were non-incumbents: of the 515 who won, 52 percent were non-incumbents and only 48 percent were incumbents. The decline in the number of Californians seeking school board positions and the relatively high number of non-incumbents elected may indicate the difficulties of serving on a school board in a period of fiscal challenges.

## TABLE 1.2 TEXT FOR SCHOOL DISTRICT BALLOT MEASURES BY COUNTY, 2007

ALAMEDA	6/5/2007	Emery Unified	Measure A	Pass (2/3 required)
To continue the improvement of student achievement in Emeryville schools by continuing local funding for reading, math, and science instruction; keeping class sizes small; retaining qualified and experienced teachers and school employees; maintaining classroom technology; and supporting educational programs, shall Emery Unified School District extend its expiring parcel tax at 15 cents per square foot of improved property for ten years with an exemption for seniors, an independent citizen's oversight committee and all funds staying local?				
CONTRA COSTA	8/28/2007	West Contra Costa Unified	Measure G	Fail (2/3 required)
To maintain reduced class sizes, purchase textbooks and teaching materials; enhance core subjects; attract and retain teachers; maintain library services, counselors, after-school programs and custodial services; and fund school safety programs, shall West Contra Costa Unified School District be authorized to levy, for 8 years commencing upon the expiration date of the existing parcel tax, an annual tax of 11¢ per square foot of total building area or \$11.00 per vacant parcel, with an exemption for eligible senior citizens?				
CONTRA COSTA	11/6/2007	Lafayette Elementary	Measure J	Pass (2/3 required)
To prevent deep cuts at our elementary and middle schools; preserve small class sizes; attract and retain qualified and experienced teachers, classroom aides, and counselors; provide up-to-date textbooks, instructional materials and classroom technology; and support educational programs that enhance student health and achievement, shall Lafayette School District extend its expiring school parcel tax for seven years at \$313.00 per parcel, with an exemption for seniors, adjustment for inflation, and all funds staying local to benefit Lafayette schools?				
IMPERIAL	6/5/2007	McCabe Union Elementary	Measure U	Fail (2/3 required)
To improve educational opportunities for students and provide a modern teaching and learning environment, shall the McCabe Union Elementary School District construct a gymnasium, athletic facilities and supporting educational facilities by issuing \$7,000,000 in bonds at interest rates below legal limits, with annual financial audits, citizens' oversight and no money for administrators' salaries?				
KERN	5/22/2007	Vineland Elementary	Measure C	Pass (2/3 required)
To improve the quality of education for local students, shall the Vineland School District be authorized to construct a gym for student and community use, improve security fencing around Vineland and Sunset schools for student safety, and upgrade and modernize heating and air conditioning systems at Vineland school by issuing \$4.0 million in bonds within legal interest rates with no monies for salaries or administrative costs?				
KERN	6/5/2007	Richland Union Elementary	Measure D	Fail (2/3 required)
To enable Richland School District to upgrade and renovate schools including heating, cooling, plumbing, and electrical systems; construct a new school to reduce overcrowding; provide sports and music facilities at Richland Junior High; make safety improvements; update technology infrastructure; and qualify for up to \$14,000,000 in matching grants; shall the District be authorized to issue \$19,800,000 of bonds to acquire or improve real property, within legal interest rates and with no money for teacher or administrator salaries?				
KERN	9/18/2007	Mojave Unified	Measure E	Fail (2/3 required)
To provide the children in California City with schools comparable to other communities, complete the construction of California City High School and Hacienda Elementary School, upgrade the technology infrastructure to improve student access to modern technology and to construct, acquire and improve school facilities, shall the Mojave Unified School District School Facilities Improvement District No. 1 be authorized to issue \$24,000,000 in bonds at legal interest rates with annual audits and a taxpayers' oversight committee?				
KERN	11/6/2007	Muroc Joint Unified	Measure H	Fail (2/3 required)
To improve the quality of education, renovate and upgrade existing schools including roof repairs, science labs, libraries, and energy efficient windows, make health and safety improvements including removing asbestos; update electrical systems to improve access to computers and technology; improve playgrounds and playfields, and qualify the District for approximately \$1,200,000 in State grants, shall Muroc Joint Unified School District issue \$14,800,000 of bonds at legal interest rates, with independent oversight, and no money for teacher or administrative salaries?				
KERN	11/6/2007	Wasco Union High	Measure G	Fail (2/3 required)
To improve the quality of education, renovate classrooms and school facilities including upgrading and replacing plumbing, electrical, heating and air conditioning systems, build new classrooms and facilities to relieve overcrowding, repair roofs, modernize the auditorium, make health and safety improvements, improve student access to computers and modern technology, and qualify the District for \$12,200,000 in State-matching grants, shall Wasco Union High School District issue \$45,000,000.00 of bonds at legal interest rates, and no money for teacher or administrative salaries?				
LOS ANGELES	3/6/2007	San Marino Unified	Measure R	Pass (2/3 required)
In order to continue funding quality educational programs and classroom instruction, prevent increases in class sizes and reductions in teaching positions, attract and retain high quality teachers and employees, and support educational programs that enhance student achievement, shall San Marino Unified School District extend the expiring school parcel tax for six years at \$295 per parcel with an exemption for seniors, adjustment for inflation and all money staying in our community to benefit local schools?				
LOS ANGELES	6/5/2007	Palos Verdes Peninsula Unified	Measure P	Pass (2/3 required)
To continue funding quality education programs; preserve small class sizes; retain highly qualified teachers/employees; provide up-to-date textbooks/instructional materials; keep pace with advances in classroom technology; and support educational programs that enhance student achievement, shall the Palos Verdes Peninsula Unified School District extend its expiring school parcel tax for five years at \$209 per parcel with an independent citizens' oversight committee and an exemption for seniors, age 65 or over, and all money staying locally to benefit our schools?				

## TABLE 1.2 TEXT FOR SCHOOL DISTRICT BALLOT MEASURES BY COUNTY, 2007

LOS ANGELES	6/12/2007	Wiseburn Elementary	Measure A	Pass (2/3 required)
To provide all children with the same quality classrooms, modern technology and facilities, shall the Wiseburn School District build a new Cabrillo Elementary School to replace the nearly 60-year old facility, construct, acquire and improve school facilities, and make the District eligible to receive \$4,000,000 in state matching funds by issuing \$32,600,000 in bonds at interest rates below legal limits, with annual audits, a taxpayers' oversight committee and no increase in annual tax rates?				
LOS ANGELES	11/6/2007	Antelope Valley Union High	Measure W	Fail (55% required)
To relieve severe school overcrowding, build two new high schools, upgrade facilities at existing high schools, and acquire, repair, construct and equip classrooms, labs, schools, sites and facilities, shall the Antelope Valley Joint Union High School District issue \$240 million in bonds at legal interest rates and appoint a Citizens' Oversight Committee to ensure that bond monies are used for voter-approved purposes only and that no monies are used for administrator salaries?				
LOS ANGELES	11/6/2007	Las Virgenes Unified	Measure E	Pass (2/3 required)
To support high academic achievement in science, math, reading, and the arts, provide needed textbooks and instructional materials and student counseling/support services, shall the Las Virgenes Unified School District maintain its expiring school parcel tax of \$98/year, without increase, per parcel for eight years with exemptions available for seniors and disabled persons, an independent fiscal oversight committee, with no funds used for administrator's salaries and every dollar staying in this community to preserve quality education?				
LOS ANGELES	11/6/2007	Lennox Elementary	Measure L	Pass (55% required)
To acquire, construct, repair, and improve Lennox charter high school facilities, including classrooms, science labs, and support facilities and improve student access to computers and modern technology, shall the Lennox School District be authorized to issue \$10,700,000 in bonds at legal interest rates, with annual audits, a citizens' oversight committee, no money for overhead or administrator salaries, and provided all funds are spent locally and cannot be transferred to the State?				
LOS ANGELES	11/6/2007	Walnut Valley Unified	Measure S	Pass (55% required)
To attract/retain quality teachers, improve instruction, student health and safety, and classroom facilities, qualify for \$25,000,000 in State matching funds, shall Walnut Valley Unified School District repair, renovate, acquire, construct, and equip classrooms, science labs, sites, school facilities, including upgrading outdated bathrooms, plumbing, roofs, computer technology, fire safety equipment, and earthquake retrofit classrooms, by issuing \$64,600,000 of bonds at legal rates, with mandatory audits, citizen oversight, and no money for administrators' salaries?				
LOS ANGELES	11/6/2007	Walnut Valley Unified	Measure Y	Pass (55% required)
To provide a healthy learning environment and improve student health and safety, shall Walnut Valley Unified School District issue \$15,200,000 in bonds at legal rates to improve school grounds, fields and facilities, including upgrading unsafe tracks, gyms and equipment, adding tennis courts, constructing a Diamond Bar High School pool, and completing necessary upgrades to athletic facilities; with mandatory audits, independent citizen oversight, and no money for administrators' salaries?				
MARIN	3/6/2007	Ross Elementary	Measure A	Pass (2/3 required)
To maintain small class size, science, technology, library, fine arts, Spanish, learning lab and other programs, shall the Ross School District extend its previously approved parcel tax for a period of eight (8) years at the rate of \$626.98 in the first year, and at such rate plus an annual 3% cost-of-living adjustment for each year thereafter, beginning July 1, 2007, with exemptions available for property owners age 65 or older?				
MARIN	5/8/2007	Petaluma Joint Union High	Measure C	Pass (2/3 required)
To preserve funding for important educational programs in grades 7-12, keep school libraries open, maintain music and fine arts programs, maintain reduced class sizes, provide up-to-date computer and technology instruction, and attract and retain qualified and experienced teachers, shall the Petaluma Joint Union High School District continue its existing tax of \$50 per parcel without increasing taxes, with an exemption for seniors, and with all money staying in our community to benefit local schools?				
MARIN	11/6/2007	Reed Union Elementary	Measure A	Pass (2/3 required)
In order to maintain and enhance the quality of public education in Tiburon, Belvedere, and east Corte Madera by providing continued support for small classes, exceptional instructional programs, essential curriculum development, and professional training, shall the Reed Union School District be authorized to renew a special assessment commencing July 1, 2008 for a maximum of eight years at the rate of \$319.00 per parcel per year with a 3% yearly adjustment and an exemption for property owners age 65 and older?				
MONO	11/6/2007	Mammoth Unified	Measure S	Pass (2/3 required)
To ensure reliable funding for our schools in order to maintain current classroom programs, provide books and classroom materials for students, update computers, provide technology support, keep smaller class sizes and retain high quality teachers, shall the Mammoth Unified School District be authorized to implement a limited four-year instructional parcel tax of \$59 per taxable parcel to be overseen by a citizens' oversight committee with exemptions for primary residences of owners age sixty-five and older?				

## TABLE 1.2 TEXT FOR SCHOOL DISTRICT BALLOT MEASURES BY COUNTY, 2007

PLACER	4/24/2007	Roseville Joint Union High	Measure A	Pass (2/3 required)
Shall Facilities Improvement District No. 1 of the Roseville Joint Union High School District issue \$115 million in bonds at legal interest rates to construct a comprehensive high school comparable to existing District facilities, acquire land, install infrastructure and fund all related construction, planning and environmental expenses associated therewith?				
PLACER	11/6/2007	North Area Unified-Proposed	Measure B	Fail
Shall the Del Paso Heights Elementary School District, the Grant Joint Union High School District, the North Sacramento Elementary School district, and the Rio Linda Elementary School District unify into one new district serving students in kindergarten through grade 12, with a seven-member governing board consisting of one member residing in each of seven trustee areas elected by the registered voters of the entire unified school district?				
PLACER	11/6/2007	Ophir Elementary/Loomis Union Elementary	Measure D	Pass
Shall the Ophir Elementary School District annex into the Loomis Union School District?				
RIVERSIDE	11/6/2007	Alvord Unified	Measure H	Pass (55% required)
To improve student safety/security at neighborhood schools; reduce severe overcrowding by constructing/equipping a new high school, including science, computer and vocational technology labs, library; upgrading health, fire safety, security and outdated electrical systems, building or expanding libraries, classrooms, restrooms; improving educational opportunities for students; shall Alvord Unified School District issue \$196 million of bonds at legal interest rates, with independent citizens' oversight, annual audits and no money for administrators' salaries?				
RIVERSIDE	11/6/2007	Jurupa Unified	Measure I	Fail
Shall trustee areas be abolished in the Jurupa Unified School District, County of Riverside?				
SACRAMENTO	3/27/2007	Folsom-Cordova Unified	Measure M	Pass (2/3 required)
To qualify for state funding and developer fees, construct elementary, middle, and high schools, libraries, computer labs, support facilities, acquire land, and purchase equipment and computer technology, shall the School Facilities Improvement District No. 3 of the Folsom Cordova Unified School District issue \$750 million in bonds at legal interest rates and appoint a citizens' oversight committee to monitor expenditures?				
SACRAMENTO	11/6/2007	North Area Unified-Proposed	Measure B	Pass
Shall the Del Paso Heights Elementary School District, the Grant Joint Union High School District, the North Sacramento Elementary School District, and the Rio Linda Elementary School District unify into one new district serving students in kindergarten through grade 12, with a seven-member governing board consisting of one member residing in each of seven trustee areas elected by the registered voters of the entire unified school district?				
SAN BERNARDINO	11/6/2007	Muroc Joint Unified	Measure H	Fail (2/3 required)
To improve the quality of education, renovate and upgrade existing schools including roof repairs, science labs, libraries, and energy efficient windows, make health and safety improvements including removing asbestos; update electrical systems to improve access to computers and technology; improve playgrounds and playfields, and qualify the District for approximately \$1,200,000 in State grants, shall Muroc Joint Unified School District issue \$14,800,000 of bonds at legal interest rates, with independent oversight, and no money for teacher or administrative salaries?				
SAN MATEO	3/6/2007	Las Lomas Elementary	Measure P	Pass (2/3 required)
To maintain educational excellence and high academic standards, keep class sizes small, improve reading and writing, offer music, art and language classes, provide students access to computers, maintain science, math and technology classes, other classroom needs, and attract/retain high quality teachers, shall the Las Lomas Elementary School District replace and increase the current parcel tax by \$115 (\$196 to \$311) beginning July 1, 2007, with exemptions for residents 65 and older and with public accountability measures?				
SAN MATEO	5/8/2007	Millbrae Elementary	Measure R	Fail (2/3 required)
With a full tax exemption available to senior citizens, and to ensure that the children of Millbrae receive a quality education and have safe and healthy classrooms, shall the Millbrae Elementary School District be authorized to levy an annual tax of seventy-eight dollars per taxable parcel, limited to five years, to provide funds to reinstate custodians, maintenance personnel, librarians, music instruction, and technology and instructional aides, and support the District's high quality academic programs?				
SAN MATEO	5/8/2007	Pacifica Elementary	Measure Q	Fail (2/3 required)
To implement a community commitment to quality education by attracting and retaining experienced and high quality teaching and support staff, improving teacher training in academic subjects, enhancing library services, and preventing additional cutbacks in instructional programs, shall the Pacifica School District levy a special tax at the rate of \$96/year per parcel beginning July 1, 2007, for a period of five years, with an exemption for primary residence available to individuals aged 65 and older?				
SAN MATEO	11/6/2007	Burlingame Elementary	Measure A	Pass (55% required)
Burlingame Schools Safety and Repair Measure: To maintain excellent local schools, fix leaky, deteriorated roofs, improve fire safety, repair and upgrade classrooms, heating/ventilation systems for energy efficiency, and update science, computer and instructional technology, shall Burlingame Elementary School District issue \$48.3 million of bonds at legal rates to renovate, acquire, construct, repair and equip local neighborhood schools, sites and facilities, with required independent financial audits, citizens' oversight and no money for administrators' salaries?"				

## TABLE 1.2 TEXT FOR SCHOOL DISTRICT BALLOT MEASURES BY COUNTY, 2007

SONOMA	5/8/2007	Petaluma City Elementary	Measure D	Pass (2/3 required)
To preserve funding for important educational programs at elementary schools, keep school libraries open, preserve reading specialists, maintain music and fine arts programs, maintain reduced class size in grades 4-6, provide up-to-date computer and technology instruction, and attract and retain qualified and experienced teachers, shall the Petaluma City Elementary School District continue its existing tax of \$75 per parcel without increasing taxes, with an exemption for seniors, and all money staying in our community to benefit local schools?				
SONOMA	5/8/2007	Petaluma Joint Union High	Measure C	Pass (2/3 required)
To preserve funding for important educational programs in grades 7-12, keep school libraries open, maintain music and fine arts programs, maintain reduced class sizes, provide up-to-date computer and technology instruction, and attract and retain qualified and experienced teachers, shall the Petaluma Joint Union High School District continue its existing tax of \$50 per parcel without increasing taxes, with an exemption for seniors, and with all money staying in our community to benefit local schools?				
SONOMA	11/6/2007	Sonoma Valley Unified	Measure E	Fail (2/3 required)
To improve education for our children and provide accountability to taxpayers, to recruit and retain excellent teachers, keep school libraries open, provide vocational career education programs, increase access to technology, restore cuts necessitated by lack of state funding, require annual audits and prohibit use for administrative salaries, shall the District be authorized to implement a special ninety-one dollar tax per taxable parcel for six years?				
STANISLAUS	11/6/2007	Denair Unified	Measure K	Pass (55% required)
To build new classrooms and facilities and improve the overall quality of education, shall the Denair Unified School District be authorized to build a new middle school to reduce student overcrowding, provide the local match for \$14,000,000 in State funds, and improve student access to modern technology by issuing \$13,000,000 in bonds at legal interest rates, with a citizens' oversight committee, annual audits, and NO money for salaries, administration or overhead?				
STANISLAUS	11/6/2007	Hart-Ransom Union Elementary	Measure G	Pass (55% required)
In order to provide adequate facilities that best serve the students and community by constructing and equipping a multipurpose building, six charter school classrooms, two traditional school classrooms, four athletic fields, and additional off street parking, shall the Hart-Ransom Union School district issue bonds in the amount of \$3.9 million with interest rates within the legal limit?				
TRINITY	11/6/2007	Trinity Union High	Measure Q	Pass (2/3 required)
Approve the resolution by Trinity Union High School District, and Weaverville Elementary School District to become one newly unified school district on July 1, 2008, as requested by both boards on August 10, 2005, as approved by the Trinity County committee on School District Organization on February 2006, after public hearings in all affected districts, and approved by the California State Board of Education on May 9, 2007. All other feeder elementary school districts within the Trinity Union High School district boundaries, after public hearings, resolved not to be part of the newly unified district, and shall remain intact as separate school districts.				
VENTURA	11/6/2007	Las Virgenes Unified	Measure E	Pass (2/3 required)
To support high academic achievement in science, math, reading, and the arts, provide needed textbooks/instructional materials and student counseling/support services, shall the Las Virgenes Unified School District maintain its expiring school parcel tax of \$98/year, without increase, per parcel for eight years with exemptions available for seniors and disabled persons, an independent fiscal oversight committee, with no funds used for administrators' salaries and every dollar staying in this community to preserve quality education?				
YOLO	11/6/2007	Davis Joint Unified	Measure Q	Pass (2/3 required)
Shall the Davis Joint Unified School District renew a special tax for an additional four years at the annual rate of \$100 per dwelling unit for all multidwelling unit parcels and \$200 per parcel for all other parcels, providing enhanced reading and mathematics programs; increased instructional program offerings; reduced class size at selected grades; additional nursing, counseling and support services; improved nutrition through fresh farm produce; supplemental staff training; classroom, library, and technology supplemental materials, equipment and services?				
YOLO	11/6/2007	Washington Unified	Measure S	Fail (55% required)
To provide excellent local schools for West Sacramento, modernize campuses, enhance career technical education, add science classrooms, enhance technology, improve school safety, and become eligible for millions in additional State dollars, shall the Washington Unified School District be authorized to issue \$59,000,000 of bonds at interest rates within the statutory limit, with annual independent audits and an independent citizens' oversight committee, no bond money for administrative salaries and all funds spent locally on school improvements?
