

BALLOT DESIGN ADVISORY COMMITTEE (BDAC) MEETING
ZOOM 2-24-2022 TRANSCRIPT

1

00:01:41.850 --> 00:01:48.870

Jannell Jackson-CA Secretary of State Shirley N. Weber, Ph.D.: hey rain and not sure how I got on this side of the world, but there's tons of people in the waiting room.

2

00:01:56.850 --> 00:01:58.770

REINA MILLER: Oh, there we go, but it should be.

3

00:02:00.090 --> 00:02:00.600

REINA MILLER: Thank you.

4

00:02:12.660 --> 00:02:18.450

REINA MILLER: afternoon everyone just allowing for people to continue to join in so we'll give it another minute.

5

00:02:24.540 --> 00:02:26.640

Jannell Jackson-CA Secretary of State Shirley N. Weber, Ph.D.: Are you talking to me right, because I couldn't hear you.

6

00:02:27.150 --> 00:02:30.930

REINA MILLER: Oh, can you guys hear me I can't hear you.

7

00:02:31.050 --> 00:02:31.200

I.

8

00:02:32.220 --> 00:02:32.520

Karen Rhea: hear you.

9

00:02:36.030 --> 00:02:36.720

Kirsten Larsen: I can't.

10

00:02:37.230 --> 00:02:37.620

Okay.

11

00:02:40.440 --> 00:02:41.460

Jannell Jackson-CA Secretary of State Shirley N. Weber, Ph.D.: Maybe it's just me.

12

00:02:43.980 --> 00:02:46.830

REINA MILLER: Let me, can you hear the rest of the people.

13

00:02:48.000 --> 00:02:49.800

Natalie Adona: like to hear everybody just fine.

14

00:02:50.130 --> 00:02:54.870

Natalie Adona: Okay, that everyone's talking but I can hear the people who are making noise.

15

00:02:56.130 --> 00:03:01.680

REINA MILLER: Make sure to let me know if i'm yelling Sometimes I feel like I forget that I have headphones better very close to my mouth so.

16

00:03:02.760 --> 00:03:03.210

REINA MILLER: Let me know.

17

00:03:03.900 --> 00:03:05.400

Natalie Adona: What you can do if you could try.

18

00:03:08.820 --> 00:03:11.490

REINA MILLER: i'm not a yeller i'm glad you, you see that natalie.

19

00:03:13.560 --> 00:03:14.610

Natalie Adona: i'm on your side.

20

00:03:15.000 --> 00:03:18.840

REINA MILLER: Your heart things like your office that everything calmed down a little bit.

21

00:03:19.260 --> 00:03:22.080

Natalie Adona: yeah yeah things are calm down a little bit.

22

00:03:23.370 --> 00:03:31.350

Natalie Adona: We have for candidates filing there is someone who is file to run against me, and I say bring it.

23

00:03:31.650 --> 00:03:33.150

REINA MILLER: bring it that'd be fun right.

24

00:03:35.430 --> 00:03:36.270

Natalie Adona: fun for who.

25

00:03:43.560 --> 00:03:43.770

REINA MILLER: Oh.

26

00:03:43.890 --> 00:03:45.450

REINA MILLER: So Whitney your your sound is working.

27

00:03:46.770 --> 00:03:50.430

Whitney Quesenbery, Civic Design: yeah I hadn't answered yes to the video, and so it wouldn't let me do anything.

28

00:03:52.650 --> 00:04:10.230

REINA MILLER: let's see I think most people here at 232 so I said we go ahead and get started that afternoon everyone, I think this is the first time we're meeting since last year, so hopefully everyone's years going by pretty good i'm going to go ahead and get started with roll call.

29

00:04:11.610 --> 00:04:12.690

REINA MILLER: So let's see, so we have.

30

00:04:19.230 --> 00:04:19.710

REINA MILLER: Brian.

31

00:04:20.610 --> 00:04:21.360
Brian - LA County: yep here.

32
00:04:22.800 --> 00:04:23.340
REINA MILLER: Christopher.

33
00:04:27.720 --> 00:04:28.050
Christopher Neubauer: i'm here.

34
00:04:28.740 --> 00:04:29.310
Thank you.

35
00:04:31.980 --> 00:04:32.280
Stephen Aye: here.

36
00:04:50.280 --> 00:04:51.900
REINA MILLER: Oh there's two things out.

37
00:04:55.740 --> 00:04:56.310
REINA MILLER: And then, James.

38
00:04:58.860 --> 00:05:00.060
James Wight: James w is here, yes.

39
00:05:00.420 --> 00:05:00.870
REINA MILLER: Thank you.

40
00:05:01.980 --> 00:05:02.520
REINA MILLER: Jennifer.

41
00:05:16.050 --> 00:05:16.500
REINA MILLER: john.

42

00:05:28.380 --> 00:05:28.830

REINA MILLER: happy.

43

00:05:44.250 --> 00:05:44.640

REINA MILLER: live.

44

00:05:49.680 --> 00:05:50.160

REINA MILLER: Maria.

45

00:05:56.160 --> 00:05:56.670

REINA MILLER: Marina.

46

00:06:04.680 --> 00:06:05.430

REINA MILLER: natalie.

47

00:06:06.240 --> 00:06:06.540

here.

48

00:06:08.250 --> 00:06:08.670

REINA MILLER: stephanie.

49

00:06:21.390 --> 00:06:22.170

REINA MILLER: Marina Thank you.

50

00:06:39.900 --> 00:06:42.930

Victor Chavarin - Kings: i'm here, thank you and Whitney.

51

00:06:47.670 --> 00:06:48.810

Whitney Quesenbery, Civic Design: i'm here, but I can't get.

52

00:06:51.060 --> 00:06:53.220

REINA MILLER: Anyone from the point that I missed.

53

00:06:56.430 --> 00:06:58.290

REINA MILLER: Committee sorry not support the company.

54

00:07:00.180 --> 00:07:05.610

Maria Valadez: Right now, this is Maria validus that I think there's two Marie is on this, so I don't know what you call.

55

00:07:06.030 --> 00:07:07.650

REINA MILLER: Quote unquote you, thank you, Maria.

56

00:07:12.180 --> 00:07:12.810

REINA MILLER: Can I see.

57

00:07:18.030 --> 00:07:20.580

REINA MILLER: So let me just make sure we have quorum one second.

58

00:07:29.850 --> 00:07:30.510

REINA MILLER: Yes, we do.

59

00:07:32.100 --> 00:07:32.730

REINA MILLER: Anyone from.

60

00:07:45.840 --> 00:07:46.140

Robbie Anderson: here.

61

00:07:47.070 --> 00:07:47.490

Stephen.

62

00:07:51.390 --> 00:07:52.500

Jannell Jackson-CA Secretary of State Shirley N. Weber, Ph.D.: chanel Jackson.

63

00:07:54.360 --> 00:07:59.250

JANA LEAN: For a little bit, I know I gotta hop off for this, and probably a few minutes but i'm here.

64

00:08:04.290 --> 00:08:05.430

NaKeshia Robinson: With keyshia Robinson.

65

00:08:20.220 --> 00:08:24.150

REINA MILLER: couple Members join if you wouldn't mind stating your name, please.

66

00:08:26.250 --> 00:08:27.180

Kelly Sanders, Humboldt: Kelly Sanders.

67

00:08:29.940 --> 00:08:30.900

Dave Haines: Dave haynes.

68

00:08:35.400 --> 00:08:35.850

Adrian Avelar - LA County: Adrian.

69

00:08:36.510 --> 00:08:37.620

Susan King Roth: Ross oh.

70

00:08:42.150 --> 00:08:44.430

REINA MILLER: Sorry, I missed I missed the last two people.

71

00:08:49.860 --> 00:08:53.250

Dave Haines: Dave haines if you didn't get that great Thank you.

72

00:08:58.500 --> 00:09:03.900

Susan King Roth: Susan member of the public, on behalf of California voters foundation.

73

00:09:06.180 --> 00:09:08.910

REINA MILLER: Thank you, any other members of the public Tony Nicole.

74

00:09:14.010 --> 00:09:15.840

Kirsten Larsen: Nicole Becker and Harry.

75

00:09:16.920 --> 00:09:19.410

Kirsten Larsen: are more and i'm sorry if i'm butchering your last name Harry.

76

00:09:21.000 --> 00:09:25.020

Kirsten Larsen: Nichols with assembly elections committee and here he is with assembly Member mark Berman.

77

00:09:29.100 --> 00:09:30.060

REINA MILLER: Monica for.

78

00:09:39.540 --> 00:09:40.830

REINA MILLER: Maria Thank you Maria.

79

00:09:44.850 --> 00:09:46.680

REINA MILLER: anyone else that I missed from the committee.

80

00:09:53.940 --> 00:10:02.400

REINA MILLER: Just a quick reminder, if you could please mute your phone and then you if you want these are going to go ahead and get started with our first agenda item.

81

00:10:02.850 --> 00:10:12.570

REINA MILLER: For post election changes by working group also the only agenda item for today so during the break that we had we worked in a working group to go over more election post.

82

00:10:13.020 --> 00:10:21.510

REINA MILLER: It was attached to the medicine agenda and I will have Whitney if you don't mind sharing your screen share that as well.

83

00:10:25.800 --> 00:10:27.090

REINA MILLER: When we make your hook Whitney.

84

00:10:46.320 --> 00:10:48.150

REINA MILLER: Okay Whitney let me know if you're able to share.

85

00:10:57.900 --> 00:11:01.350

REINA MILLER: And I don't hear you Whitney speaking up we're not able to hear you.

86

00:11:03.150 --> 00:11:06.030

Whitney Quesenbery, Civic Design: During sharing of course everything disappears and moves around.

87

00:11:08.670 --> 00:11:11.760

Whitney Quesenbery, Civic Design: You should be seeing my screen and hearing me.

88

00:11:23.760 --> 00:11:26.550

Natalie Adona: We hear you Whitney, just in case you're waiting for that.

89

00:11:29.340 --> 00:11:35.850

Whitney Quesenbery, Civic Design: Okay, I suppose I should go ahead and do my video So you can see me going nodding, instead of just assuming that you can see me.

90

00:12:13.500 --> 00:12:15.750

REINA MILLER: What do you want to leave with the question or did you want.

91

00:12:16.260 --> 00:12:16.620

Whitney Quesenbery, Civic Design: Oh no.

92

00:12:17.310 --> 00:12:21.180

Whitney Quesenbery, Civic Design: No, sorry happy to read, was it wasn't sure you already to start i'm.

93

00:12:23.190 --> 00:12:33.240

Whitney Quesenbery, Civic Design: In the second half, in the second group of measures we work through a list of code sections that people had suggested needed update.

94

00:12:34.500 --> 00:12:43.680

Whitney Quesenbery, Civic Design: i'm going to ask the Committee to help jump in on what

we're doing it's been a long time, and a lot of these discussions were about details of election administration, I think you're probably the better one, to speak about it.

95

00:12:45.090 --> 00:12:46.620

Whitney Quesenbery, Civic Design: The first is a definition.

96

00:12:48.030 --> 00:12:49.320

Whitney Quesenbery, Civic Design: Of a ballot.

97

00:12:51.450 --> 00:12:51.780

Whitney Quesenbery, Civic Design: and

98

00:12:53.310 --> 00:12:53.610

Whitney Quesenbery, Civic Design: well.

99

00:12:54.630 --> 00:12:56.970

Whitney Quesenbery, Civic Design: I guess the discussion was that we thought that the that the.

100

00:12:59.250 --> 00:13:06.690

Whitney Quesenbery, Civic Design: The existing section a was confusing because it's we're trying to expunge references to.

101

00:13:08.160 --> 00:13:14.280

Whitney Quesenbery, Civic Design: punch cards and it starts with a combination of a card with number of positions, it is marked by the voter and.

102

00:13:15.960 --> 00:13:20.760

Whitney Quesenbery, Civic Design: Number of positions or not, how how people vote, but certainly not universal against all voting system so.

103

00:13:21.270 --> 00:13:29.970

Whitney Quesenbery, Civic Design: The proposal we came up with is a valid as the presentation of the contest consisting of offices and measures and the candidates and options to be voted on.

104

00:13:30.540 --> 00:13:40.890

Whitney Quesenbery, Civic Design: The contents may be rendered using various methods of presentation visual or audio and and not to accessibility language or graphics and then the ballot presentation there's several so.

105

00:13:42.240 --> 00:13:45.450

Whitney Quesenbery, Civic Design: We see if I can fit them all on the screen, yes, we can.

106

00:13:47.640 --> 00:13:58.560

Whitney Quesenbery, Civic Design: So that it can bell it may include one or more sheets of paper on which are printed the names of candidates for each contest and the titles of measures that's the same except, adding that kind of speech contest this on the side.

107

00:14:00.000 --> 00:14:08.070

Whitney Quesenbery, Civic Design: d one replaced with an electronic device, rather than just touch screen, because not all of them were touch screens, on which the names of candidates for each contest.

108

00:14:08.340 --> 00:14:27.240

Whitney Quesenbery, Civic Design: And about titles of measures to be voted on, are selected by touching the screen or using other physical controls and then D to printed ballot produced by a ballot marking device sorry oh by mouth marketing device may be a list of voter selections or maybe a facsimile of a mark ballot.

109

00:14:36.840 --> 00:14:37.080

So.

110

00:14:38.280 --> 00:14:39.840

Whitney Quesenbery, Civic Design: that's comments defensive discussion.

111

00:14:50.310 --> 00:14:53.100

Joanna Francescut - shasta: I have a question about the one can you hear me okay.

112

00:14:53.850 --> 00:14:58.800

Whitney Quesenbery, Civic Design: yeah Could you say, could you say your name when you're

talking I can't see the list of people in high school same time very easily.

113

00:14:59.880 --> 00:15:01.320

Joanna Francescut - shasta: i'm sorry this is Joanna.

114

00:15:01.710 --> 00:15:15.000

Joanna Francescut - shasta: Joanna from Chester hi i'm so I just wanted this month for the over the Secretary of State staff so in the past, you know, this is the one has kind of pulled in from.

115

00:15:15.990 --> 00:15:33.150

Joanna Francescut - shasta: electronic voting where we didn't necessarily have a verified paper show or about actually goes with it, so is that, even so, the prior or what is due to cover that I guess Those are my questions is that something that we need to have a definition on.

116

00:15:34.350 --> 00:15:36.270

Whitney Quesenbery, Civic Design: Our hope was that would cover it.

117

00:15:37.500 --> 00:15:37.740

Joanna Francescut - shasta: Okay.

118

00:15:37.770 --> 00:15:37.980

No.

119

00:15:40.200 --> 00:15:43.110

Whitney Quesenbery, Civic Design: No actually I wouldn't cut maybe what he discovered cover.

120

00:15:43.860 --> 00:15:44.790

Joanna Francescut - shasta: GT covers.

121

00:15:44.850 --> 00:15:47.280

Joanna Francescut - shasta: The paper that's produced by it.

122

00:15:47.460 --> 00:15:48.480

Whitney Quesenbery, Civic Design: yeah but not it.

123

00:15:49.980 --> 00:15:54.030

Joanna Francescut - shasta: Is that an actual ballot or it's not just a marketing device at this point.

124

00:15:55.140 --> 00:15:55.290

Joanna Francescut - shasta: This.

125

00:15:55.440 --> 00:15:56.460

Joanna Francescut - shasta: kind of technical.

126

00:15:57.030 --> 00:16:02.100

Whitney Quesenbery, Civic Design: It is pretty technical, but we think that the thing that's the ballad is actually what's produced and counted.

127

00:16:04.020 --> 00:16:07.710

Natalie Adona: But if I remember right Whitney one of the things that we had talked.

128

00:16:07.710 --> 00:16:08.970

Natalie Adona: About was in.

129

00:16:09.270 --> 00:16:18.960

Natalie Adona: In practice, what what happens and what we teach art or coworkers when people actually interface with the ballot marking devices.

130

00:16:19.620 --> 00:16:32.640

Natalie Adona: Right, because you you can't have just anyone standing over someone's shoulder while they're you know to engaged with the bmd and then say well nothing's wrong because i'm not looking at a ballot here, you would never say that.

131

00:16:34.950 --> 00:16:35.460

Whitney Quesenbery, Civic Design: that's true.

132

00:16:40.140 --> 00:16:47.700

Whitney Quesenbery, Civic Design: So D D, one would cover the electronic device on which they're making their selections and D to would cover the output.

133

00:16:49.980 --> 00:17:00.510

Whitney Quesenbery, Civic Design: I think I think that was the intention, the definitions are hard because it's really hard to write them in a neutral way, as we see from the ones that are not written in neutral way because particular time.

134

00:17:15.030 --> 00:17:25.650

Joanna Francescut - shasta: Sorry, is Joanna good so do we have any suggested changes or as a committee Okay, with the language or suggestions that we're moving forward on this elections code 301.

135

00:17:37.560 --> 00:17:40.050

Natalie Adona: Should we take silence as a yay it's okay to move on.

136

00:17:43.830 --> 00:17:47.400

Whitney Quesenbery, Civic Design: yeah just just to say that there were two intense here one was to bring.

137

00:17:48.270 --> 00:17:49.680

Call in user 1: Something my name is Richard Michael.

138

00:17:53.940 --> 00:17:54.660

Joanna Francescut - shasta: Sure go for it.

139

00:17:56.250 --> 00:18:01.530

Call in user 1: Okay, I don't know if you received I sent a multi page comment.

140

00:18:02.700 --> 00:18:10.980

Call in user 1: To the to miss Miller and i'm not sure if the committee received it, I had some comments on the on the definition changes.

141

00:18:12.180 --> 00:18:14.670

Call in user 1: And he since you're on a three one.

142

00:18:15.720 --> 00:18:33.960

Call in user 1: In this was my comment, however, you decide to do this, a ballot should simply be a set of the instructions and ballot labels, however, presented for all elections consolidated on the same election day or for elections that are not consolidated and might not win.

143

00:18:35.670 --> 00:18:46.470

Call in user 1: Oh, will consolidate it is when the governor you know, makes the declaration you consolidates all the statewide elections onto one ballot for the county and the county can also solid additional.

144

00:18:48.180 --> 00:18:57.090

Call in user 1: Elections off to the same ballot and non consolidated is this is division 10 410.

145

00:18:58.140 --> 00:19:18.630

Call in user 1: Collection code 10 400 that describes consolidation, but it basically turns single balance into one ballot, with many contests on it so, otherwise the the ballot would be a separate you know each election could conceivably as a separate ballot, but the way it's done, mostly in you know.

146

00:19:19.680 --> 00:19:26.640

Call in user 1: You know many years, there are it's mostly consolidated but cities and counties still have or cities.

147

00:19:27.240 --> 00:19:37.530

Call in user 1: still have the option to run their own elections, which means they would have a separate ballot, or they could consolidated with a county election if it's a if it's if it's on the same day.

148

00:19:41.100 --> 00:19:44.490

Whitney Quesenbery, Civic Design: Anyway, that was my comment and and specifically.

149

00:19:44.910 --> 00:19:45.750

Call in user 1: It relates to.

150

00:19:46.890 --> 00:20:00.300

Call in user 1: All of my my comments on this meeting related to ballot label and use the use of the word title and so forth in the ballot because measures do not have titles.

151

00:20:00.960 --> 00:20:13.710

Call in user 1: Only the state they all are ballot labels and the confusing language in several definitions that's been around for a long time has been this title In summary, which is for the statewide.

152

00:20:15.570 --> 00:20:18.630

Call in user 1: propositions and not for the local measures.

153

00:20:20.070 --> 00:20:32.220

Call in user 1: But it is still for the ballot is a ballot label and that's described in the in the division 99051 and so so.

154

00:20:33.810 --> 00:20:35.130

Call in user 1: So we simply said.

155

00:20:36.420 --> 00:20:38.340

Call in user 1: I don't want to interrupt too much of your meeting so.

156

00:20:40.290 --> 00:20:56.310

Whitney Quesenbery, Civic Design: i'm trying to guess i'm worried about tangling things, but if we simply said, the measures, measures revolve around because that seems to be the generic used in the code so candidates and measures to be voted on without word ballot title with that solve your problem.

157

00:20:58.170 --> 00:20:58.800

Well yeah.

158

00:21:00.180 --> 00:21:05.220

Call in user 1: That would mean that I think that would solve the problem in that definition, perhaps.

159

00:21:06.750 --> 00:21:12.150

Call in user 1: One of one of the things that you brought up because of the confusing this of the definition.

160

00:21:13.140 --> 00:21:24.630

Call in user 1: I think this definition three or one has been amended many times by the legislature and it's tried to put in, instead of describing what a ballot is.

161

00:21:25.140 --> 00:21:34.080

Call in user 1: it's describing things that are already covered in other sections of the election code, in other words what's a marketing device, you know what approved marketing devices.

162

00:21:34.890 --> 00:21:51.150

Call in user 1: touch screens, you know the other things that have been authorized by the legislature, over time, so if you try to include all those things, the technical aspects of how those things are done you're not really describing a ballot you're describing all the technical things that that.

163

00:21:52.260 --> 00:22:05.790

Call in user 1: That are talking can can be a ballot, in a sense, but they're not really the ballots, if you think about it, as this is what the voters voting on, in other words the ballot with the voter has voted on.

164

00:22:07.650 --> 00:22:10.140

Call in user 1: Right, but those two are quite different.

165

00:22:14.730 --> 00:22:24.990

Call in user 1: Well, I guess, in that sense it depends if it's if the this is, for I mean i'm not sure what the jurisdiction of I mean, I think the jurisdiction of your committee was.

166

00:22:25.410 --> 00:22:37.770

Call in user 1: was a valid design, so now you're getting into whether what you end up with is a ballot, in other words the print out of something that was done electronically or or other features like that.

167

00:22:38.940 --> 00:22:51.450

Call in user 1: or even you know, like inca dot which used to be in Los Angeles county where you know salad is that that little card right right i'm not sure where to go here, because our intent here was to fix the.

168

00:22:51.450 --> 00:22:54.000

Whitney Quesenbery, Civic Design: Problem of an of a definition in a which is.

169

00:22:54.360 --> 00:23:05.580

Whitney Quesenbery, Civic Design: A combination of a card with number of positions that is marked by the voter and the accompanying reference page or pages containing the answer candidates in the battle title that's clearly not a voting system anybody is using and therefore.

170

00:23:06.390 --> 00:23:10.590

Whitney Quesenbery, Civic Design: Is it leaves the definition that doesn't describe anybody in system use in the state.

171

00:23:12.030 --> 00:23:17.280

Whitney Quesenbery, Civic Design: So we were trying to fix that and we're using the same serena not sure where you'd like us to go on this.

172

00:23:18.300 --> 00:23:28.410

Call in user 1: Well, I was just trying to simplify it, but I mean you also have a definition of valid card which probably describes what you're that that that thing that is more.

173

00:23:29.640 --> 00:23:33.930

Call in user 1: For a Punch, in other words a Punch card or any of those things could be a card a physical.

174

00:23:35.460 --> 00:23:36.150

Call in user 1: piece of paper.

175

00:23:37.860 --> 00:23:40.770

And that was your second definition, I had a comment on that too.

176

00:23:45.720 --> 00:23:48.240

Whitney Quesenbery, Civic Design: athlete arena i'm passing this right back to you guys.

177

00:23:50.280 --> 00:23:54.570

Natalie Adona: yeah I have a process question here so.

178

00:23:56.460 --> 00:24:06.180

Natalie Adona: I mean reena did help me out here, because I am not so familiar with the to the committee rules here.

179

00:24:07.200 --> 00:24:18.330

Natalie Adona: And just so it just to be you know sort of perfectly honest, I did not have a chance to read through all of these comments they sort of came in, maybe 15 minutes before.

180

00:24:18.330 --> 00:24:20.100

Natalie Adona: This meeting and I didn't notice them.

181

00:24:20.430 --> 00:24:29.580

Natalie Adona: until five minutes before, so it is sort of hard on the spot, to be responding to pages and pages of comments.

182

00:24:30.690 --> 00:24:44.340

Natalie Adona: And you know, so you know with our with our committed meetings before and i'm not saying that we can't change the public comment period has sort of been left until afterwards and.

183

00:24:45.270 --> 00:24:54.240

Natalie Adona: You know this sort of gives the committee plenty of time to to discuss and then you know, to consider public comments.

184

00:24:55.080 --> 00:25:00.780

Natalie Adona: I like I said I don't mind changing and we have quite a bit to get through.

185

00:25:01.530 --> 00:25:19.710

Natalie Adona: Plus, you know, I would like a chance personally to sort of read and absorb the written comments that have been submitted by by Richard Michael just to you know sort of do

so in a way that's whole and sort of respectful but yeah rena.

186

00:25:20.820 --> 00:25:25.770

Call in user 1: sort of rely on this and, basically, I told them I had talked to.

187

00:25:25.830 --> 00:25:37.020

REINA MILLER: rich and I said we offer public period, but also, you know feel free if there's something that's applicable I know it is a long document so maybe jumping in and saying his comment, but I do realize it's now more of a discussion so.

188

00:25:37.290 --> 00:25:46.620

REINA MILLER: Richard I college, but if you wouldn't mind, maybe we can allow them time to review, I did just send out the email right before the meeting so that was on me as well, so maybe.

189

00:25:46.680 --> 00:25:52.800

Call in user 1: Richard of your mind already and I don't want to I don't want to interfere with your procedures that's fine with me thank you, thank you.

190

00:25:54.090 --> 00:25:57.990

Natalie Adona: Thank you so much, Richard I appreciate that i'm sure that the rest of us do as well.

191

00:26:00.000 --> 00:26:00.990

Joanna Francescut - shasta: So, also the.

192

00:26:01.080 --> 00:26:07.500

Joanna Francescut - shasta: story is Joanna just again, I just want to verify i'm actually on vacation so I have I don't have my work.

193

00:26:08.010 --> 00:26:20.670

Joanna Francescut - shasta: email on me, so I have not given and I will not be able to look at it during this meeting those comments So are we going to be able to make decisions or changes and we decided today with me.

194

00:26:21.870 --> 00:26:25.050

Whitney Quesenbery, Civic Design: Can I make a suggestion, given that there's some discussion about.

195

00:26:25.590 --> 00:26:26.160

Whitney Quesenbery, Civic Design: about the.

196

00:26:26.790 --> 00:26:27.570

Whitney Quesenbery, Civic Design: definitions, I think.

197

00:26:28.350 --> 00:26:30.420

Whitney Quesenbery, Civic Design: We we've actually discussed this in our.

198

00:26:30.870 --> 00:26:42.450

Whitney Quesenbery, Civic Design: In our working, which is trying to make sure we're not breaking things and being consistent and these were done a bit piecemeal and maybe that's a chance to but maybe we should just skip forward to.

199

00:26:43.770 --> 00:26:48.150

Whitney Quesenbery, Civic Design: develop marketing section to skip down to 1424.

200

00:26:49.890 --> 00:26:52.260

Whitney Quesenbery, Civic Design: and give her really some time to think about it, if we.

201

00:26:53.310 --> 00:27:01.470

Whitney Quesenbery, Civic Design: don't know that we'll get we may or may not get to all of this today, but at any rate, maybe get into the meat of it and sort of get our get our sea legs again as being a committee working.

202

00:27:03.120 --> 00:27:04.530

Whitney Quesenbery, Civic Design: Because I think definitions of hard.

203

00:27:07.560 --> 00:27:13.080

REINA MILLER: And I think Joanna what you were asking is whether we're going to, for example, take a look at the end of it, I don't know if we're going to get.

204

00:27:13.440 --> 00:27:24.240

REINA MILLER: Through everything so maybe maybe it is a good idea we go through what we can and then don't vote until maybe next time and that way we can allow for comments I know we had some questions Whitney that I email to the group as well.

205

00:27:24.540 --> 00:27:34.290

REINA MILLER: That we have to discuss, though I think it's safe to say that maybe today we won't vote on any of these changes and that way, we have time to think it through before next time if that's OK, with everyone.

206

00:27:35.430 --> 00:27:36.510

Whitney Quesenbery, Civic Design: I think that makes sense I.

207

00:27:36.870 --> 00:27:43.890

Whitney Quesenbery, Civic Design: just asked a question cumbersome large group to debate debate things i'm thinking it through would be great i'm going to skip down to.

208

00:27:45.030 --> 00:27:46.470

Whitney Quesenbery, Civic Design: 14 to 24.

209

00:27:48.780 --> 00:27:49.650

Whitney Quesenbery, Civic Design: Which is.

210

00:27:51.930 --> 00:27:54.270

Whitney Quesenbery, Civic Design: valid marketing and what a marketing devices.

211

00:27:55.980 --> 00:28:04.170

Whitney Quesenbery, Civic Design: I will just take the point here that Richard did make about the term being election official elections official and take out the local.

212

00:28:08.670 --> 00:28:11.100

Whitney Quesenbery, Civic Design: This was just for clarification of the text.

213

00:28:12.510 --> 00:28:17.640

Whitney Quesenbery, Civic Design: And simply suggested all ballots, and there was no point in saying, except.

214

00:28:18.270 --> 00:28:24.930

Whitney Quesenbery, Civic Design: mail valid valid, so we marked with the marketing guys provided a recommended for them well balanced by the election efficient elections official.

215

00:28:25.620 --> 00:28:35.220

Whitney Quesenbery, Civic Design: it's about it cannot be tabulated because of marketing device news which will be processed and specified in EC 15 to 10 which i've listed here just because we made a reference to it.

216

00:28:37.200 --> 00:28:37.560

Whitney Quesenbery, Civic Design: and

217

00:28:38.940 --> 00:28:42.030

Whitney Quesenbery, Civic Design: This basically is the.

218

00:28:43.260 --> 00:28:47.250

Whitney Quesenbery, Civic Design: Rules for making a true duplicate of a valid that can't be read by the scanner.

219

00:28:50.220 --> 00:28:54.420

Whitney Quesenbery, Civic Design: And this also raises one of the questions that we had, which was whether.

220

00:28:56.280 --> 00:29:01.230

Whitney Quesenbery, Civic Design: serial numbers are used, or whether there's other ways that people are using to mark up.

221

00:29:02.130 --> 00:29:11.160

Whitney Quesenbery, Civic Design: their original and duplicated ballot, so they can be identified and match together, because if there are we should either make this a neutral term like some way of.

222

00:29:11.790 --> 00:29:17.400

Whitney Quesenbery, Civic Design: matching them up, such as a serial number or if no one's using anything else, and that seems fine, then we can just leave it.

223

00:29:22.080 --> 00:29:25.020

Victor Chavarin - Kings: For for our county we provide like a.

224

00:29:26.310 --> 00:29:32.310

Victor Chavarin - Kings: identification number to compare the now void invalid, with the duplicate valid so in market like.

225

00:29:33.360 --> 00:29:37.020

Victor Chavarin - Kings: We have a numbering system that we use, but I wouldn't say it's a serial number.

226

00:29:42.690 --> 00:29:45.810

Whitney Quesenbery, Civic Design: We just said, a means of identifying the to balance.

227

00:29:47.040 --> 00:29:48.210

The two version.

228

00:29:49.890 --> 00:29:53.790

Whitney Quesenbery, Civic Design: and shall bear a marker number or identification.

229

00:29:55.950 --> 00:29:58.200

Natalie Adona: Nevada uses a number.

230

00:29:59.340 --> 00:30:06.390

Natalie Adona: You want to call it a serial number and the that's cool we number them and we mark one is original one is the duplicate.

231

00:30:07.380 --> 00:30:13.080

Victor Chavarin - Kings: yeah yeah we will do we want to keep the serial numbers, we consider our serial numbers working kings county jail.

232

00:30:14.280 --> 00:30:15.870

Victor Chavarin - Kings: Okay sounds like.

233

00:30:16.140 --> 00:30:17.970

Whitney Quesenbery, Civic Design: We can close this one, because.

234

00:30:19.980 --> 00:30:20.550

Whitney Quesenbery, Civic Design: number.

235

00:30:27.360 --> 00:30:32.610

Whitney Quesenbery, Civic Design: let's do that any discussion about the definition about learning about the.

236

00:30:35.610 --> 00:30:37.950

Whitney Quesenbery, Civic Design: section in the edits to the section.

237

00:30:54.030 --> 00:30:55.560

Whitney Quesenbery, Civic Design: Moving on then to.

238

00:30:57.300 --> 00:31:01.650

Whitney Quesenbery, Civic Design: EC for 14 285, which is about marketing.

239

00:31:02.790 --> 00:31:15.420

Whitney Quesenbery, Civic Design: Vote for and contests, this was really just a change to clarify the text on get rid of things like voting square rectangular other specific space and use it in the same way that we've.

240

00:31:16.440 --> 00:31:17.250

Whitney Quesenbery, Civic Design: done before.

241

00:31:18.630 --> 00:31:26.160

Whitney Quesenbery, Civic Design: and change this thinking, most of the words in a contest, where two or more candidates for the same office or to be elected a voter shall mark the.

242

00:31:26.490 --> 00:31:37.500

Whitney Quesenbery, Civic Design: Voting targets next to the names of the balance candidates of their choice, up to the number of candidates to be elected so most of the words are directly from the original but we've taken out the long list of what a target is.

243

00:31:38.400 --> 00:31:40.830

Whitney Quesenbery, Civic Design: In keeping with the way we've been editing the rest of the text.

244

00:31:50.880 --> 00:31:53.760

Whitney Quesenbery, Civic Design: Anybody have a comment before we plunge along.

245

00:31:55.410 --> 00:31:56.550

Natalie Adona: A Whitney it's natalie.

246

00:31:57.780 --> 00:31:58.260

Natalie Adona: I.

247

00:32:00.120 --> 00:32:09.270

Natalie Adona: didn't not to be a stick in the mud, but when when we say two or more candidates are we, including the one loan candidate, plus the right in space.

248

00:32:13.080 --> 00:32:18.330

Whitney Quesenbery, Civic Design: I actually it's where two people to be actually maybe it's where two or more.

249

00:32:20.730 --> 00:32:26.100

Whitney Quesenbery, Civic Design: yeah I think we have to assume that we are because we we there's nothing else that refers to candidate plus right in.

250

00:32:27.600 --> 00:32:33.090

Whitney Quesenbery, Civic Design: And it's really that it's really rare two or more people, for the first thing she'll be elected to the same office.

251

00:32:33.480 --> 00:32:35.250

Natalie Adona: Is it mean I don't know.

252

00:32:36.870 --> 00:32:40.950

Natalie Adona: It just occurred to me that to sometimes people run out a post.

253

00:32:43.170 --> 00:32:45.600

Natalie Adona: And there's a rating that's available oh.

254

00:32:46.080 --> 00:32:52.050

Whitney Quesenbery, Civic Design: Where I used to live we constantly had not enough candidates to vote for the right people in.

255

00:32:54.030 --> 00:32:57.090

Whitney Quesenbery, Civic Design: It seems to survive the ages, however, as being.

256

00:32:58.260 --> 00:32:59.820

Whitney Quesenbery, Civic Design: Where two or more candidates to be elected.

257

00:32:59.820 --> 00:33:02.820

Whitney Quesenbery, Civic Design: Maybe we could just leave it to be more similar to the original and.

258

00:33:03.180 --> 00:33:05.160

Whitney Quesenbery, Civic Design: Be clear that it's just clarification.

259

00:33:05.280 --> 00:33:06.300

Natalie Adona: Oh yeah yeah no.

260

00:33:06.330 --> 00:33:10.860

Natalie Adona: I feel like if it hasn't created a problem before it should not be a problem now.

261

00:33:14.040 --> 00:33:21.930

Whitney Quesenbery, Civic Design: This one should be really easy it's 1426 and we've changed the word opposite to next to again and keeping with the other edits that we've made.

262

00:33:23.070 --> 00:33:23.340

Whitney Quesenbery, Civic Design: So.

263

00:33:23.400 --> 00:33:27.690

Brian - LA County: Whitney really quick, this is Brian would la county if you scroll up a little bit.

264

00:33:28.260 --> 00:33:31.710

Brian - LA County: Our balance or watermark would remake and not duplicate.

265

00:33:32.340 --> 00:33:32.940

hmm.

266

00:33:34.200 --> 00:33:36.540

Brian - LA County: So that's our watermark on our palates.

267

00:33:37.620 --> 00:33:39.390

Brian - LA County: For 451210.

268

00:33:39.630 --> 00:33:40.320

Aha.

269

00:33:41.820 --> 00:33:44.280

Whitney Quesenbery, Civic Design: What if we said clearly labeled as a duplicate.

270

00:33:47.040 --> 00:33:49.440

Whitney Quesenbery, Civic Design: Instead of putting the word duplicate in quotes.

271

00:33:49.590 --> 00:33:49.950

yeah.

272

00:33:56.700 --> 00:34:00.810

Brian - LA County: yeah when we refer to remake it's very specific to the operation.

273

00:34:01.170 --> 00:34:01.620

mm hmm.

274

00:34:49.260 --> 00:34:53.100

Whitney Quesenbery, Civic Design: Next to the next sections are really a lot of checks clean up.

275

00:34:54.390 --> 00:34:59.040

Whitney Quesenbery, Civic Design: A lot of getting rid of to the right of the foregoing and replace it with next to the and.

276

00:35:00.660 --> 00:35:08.010

Whitney Quesenbery, Civic Design: Avoiding target Oh, this was the thing you were talking about natalie where sometimes we put the brackets you right there no there no brackets here because it's not in text.

277

00:35:10.470 --> 00:35:13.680

Whitney Quesenbery, Civic Design: it's description, rather than being a place where again replace the word.

278

00:35:14.730 --> 00:35:24.960

Whitney Quesenbery, Civic Design: The records only for replacement so again, this is just a consistency across code section, so this would now read next to the question that words, yes or no on separate lines with a voting target next to each.

279

00:35:27.450 --> 00:35:30.360

Whitney Quesenbery, Civic Design: Oh, actually, thank you especially next to us.

280

00:35:32.880 --> 00:35:35.460

Whitney Quesenbery, Civic Design: And then same thing voting target again.

281

00:35:36.690 --> 00:35:47.160

Whitney Quesenbery, Civic Design: Next to rather than to the side of and just consistency

across how we put things in the first thing another one with next tues and voting targets, I just.

282

00:35:52.680 --> 00:35:58.200

Whitney Quesenbery, Civic Design: Does anybody object to changing this to their vote for a neutral gender neutral.

283

00:35:59.310 --> 00:35:59.820

Whitney Quesenbery, Civic Design: statement.

284

00:36:06.090 --> 00:36:08.910

Whitney Quesenbery, Civic Design: Because it's either got to renew that that are his hers and.

285

00:36:10.020 --> 00:36:10.800

Whitney Quesenbery, Civic Design: Many other.

286

00:36:11.160 --> 00:36:15.060

Natalie Adona: I think both are offered in the code throughout so yeah.

287

00:36:16.170 --> 00:36:17.520

Whitney Quesenbery, Civic Design: let's let's just go to the Nice.

288

00:36:17.730 --> 00:36:22.170

Raj Bathla: Well, any new changes the legislator is using vendor neutral instead of his or her.

289

00:36:23.700 --> 00:36:26.880

Raj Bathla: So I even if we don't do it the lead counsel will do that.

290

00:36:29.310 --> 00:36:29.820

Whitney Quesenbery, Civic Design: Some work.

291

00:36:31.410 --> 00:36:41.280

Christopher Neubauer: I wouldn't need this is Chris neubauer um when we're saying next to I mean usually for questions on balance in the state the yes or no, or below the question.

292

00:36:42.300 --> 00:36:42.630

Christopher Neubauer: On.

293

00:36:42.690 --> 00:36:45.990

Christopher Neubauer: The next you see below as as a next.

294

00:36:47.340 --> 00:36:53.160

Whitney Quesenbery, Civic Design: yeah that's a good question I was, I was just I was just wondering that whether we whether we've messed that up.

295

00:36:54.900 --> 00:37:01.920

Whitney Quesenbery, Civic Design: If anybody's whenever i'm so painfully doing this, instead of using the hotkey it's because that hotkey interferes with some other hot can my system i'm.

296

00:37:04.170 --> 00:37:04.710

Whitney Quesenbery, Civic Design: either.

297

00:37:06.990 --> 00:37:11.730

Natalie Adona: I think the next to reverse to the voting target and not the placement.

298

00:37:11.760 --> 00:37:12.270

Whitney Quesenbery, Civic Design: Oh yes.

299

00:37:12.300 --> 00:37:13.560

Natalie Adona: choices of yes or no.

300

00:37:14.070 --> 00:37:18.840

Whitney Quesenbery, Civic Design: Yes, it's actually next to yes or no, whether the next to the question.

301

00:37:19.470 --> 00:37:20.940

Christopher Neubauer: Okay, good good yeah.

302

00:37:21.090 --> 00:37:21.810

Whitney Quesenbery, Civic Design: Thank you natalie.

303

00:37:26.550 --> 00:37:37.680

Whitney Quesenbery, Civic Design: And this 110 704 is simply replacing the exact wording that we that we voted on last time and previous work.

304

00:37:39.660 --> 00:37:40.320

Whitney Quesenbery, Civic Design: With the.

305

00:37:41.400 --> 00:37:43.260

Whitney Quesenbery, Civic Design: descriptions of the of it as well.

306

00:37:44.490 --> 00:37:49.530

Whitney Quesenbery, Civic Design: and taking out the box, not less than half an inch high and close by able or lines.

307

00:37:51.570 --> 00:37:58.620

Whitney Quesenbery, Civic Design: Between also took out in other sections, they are simply more elections that are repeating the same instructions for that type of election.

308

00:37:59.340 --> 00:38:12.060

Whitney Quesenbery, Civic Design: So these instructions as voter nominated offices all voters may vote in these contests candidates display a party preference or none for the information of voters, this is not a party endorsement or approval.

309

00:38:13.890 --> 00:38:18.960

Whitney Quesenbery, Civic Design: But that is a consistent update to 13 to 16 she worked on last time.

310

00:38:19.890 --> 00:38:27.540

REINA MILLER: Whitney sorry we've got a comment from Kim Alexander she thought that filling in for stressed only paper ballots are covered.

311

00:38:37.050 --> 00:38:40.830

Whitney Quesenbery, Civic Design: On that required by selecting your right, thank you.

312

00:38:44.790 --> 00:38:45.030

Whitney Quesenbery, Civic Design: yep.

313

00:38:47.760 --> 00:38:56.910

Whitney Quesenbery, Civic Design: I can tell that this is going to have to be a very careful look at all of this with like going through and checking the same phrasing of all the way through, but we're trying to be trying to be consistent.

314

00:38:59.850 --> 00:39:09.480

Whitney Quesenbery, Civic Design: and the next one is the is the next one that we had a question about which was a current issue about short and long term.

315

00:39:10.890 --> 00:39:13.560

Whitney Quesenbery, Civic Design: Where there's both a.

316

00:39:15.120 --> 00:39:20.550

Whitney Quesenbery, Civic Design: vacancy election and a full term election, at the same time, which may or not, the over overlapping.

317

00:39:23.580 --> 00:39:29.820

Whitney Quesenbery, Civic Design: I know that the secretary of state's office is working on the instructions for this election, and I don't know where you are in that.

318

00:39:31.830 --> 00:39:39.090

Whitney Quesenbery, Civic Design: We didn't make us, we have not made any suggestions, based on waiting for this after State to make some decisions but also we weren't sure.

319

00:39:39.420 --> 00:39:50.070

Whitney Quesenbery, Civic Design: Maybe we're just a group of four or five people what the comment what common terms are being used, I know that we did think about a couple of things one was being able to.

320

00:39:50.670 --> 00:39:58.740

Whitney Quesenbery, Civic Design: put some words around this that told you what the term was that is either full term or a term lasting until this a certain date.

321

00:40:00.540 --> 00:40:07.410

Whitney Quesenbery, Civic Design: And the challenge of not wanting to make this description too long, both for the sake of all voters, but also for the sake of.

322

00:40:08.610 --> 00:40:10.530

Whitney Quesenbery, Civic Design: Balance that have more than one language on them.

323

00:40:12.930 --> 00:40:14.340

Natalie Adona: When he this is natalie.

324

00:40:15.840 --> 00:40:21.600

Natalie Adona: I think, where we landed on that, and this is in ccr O V two two or three one.

325

00:40:22.800 --> 00:40:32.430

Natalie Adona: I think we landed on partial or unexpired term for the upcoming June primary but I don't know that the instructions actually referred to it in that way.

326

00:40:34.410 --> 00:40:53.430

Natalie Adona: Someone from SOS probably remembers better than ideal, but I mean i'm looking at some of the bullet instructions here in the ccr ravi and it there's there's really no reference to it for for the vote, or just a reference to the remainder of the current term.

327

00:40:55.800 --> 00:41:05.550

Whitney Quesenbery, Civic Design: And I think one of the Nice, one of the interesting thing is we're not going to get this into legislation, this year, which means that we could do something.

328

00:41:06.450 --> 00:41:18.960

Whitney Quesenbery, Civic Design: We could do a sort of provisional following the lead of the secretary state, we propose the following and then revisit it after the primary to see if there's any confusions caused by it, that we might make us want to revisit the definition.

329

00:41:20.010 --> 00:41:22.890

Whitney Quesenbery, Civic Design: or search a definition.

330

00:41:32.010 --> 00:41:33.450

Raj Bathla: I think that's a good plan with me.

331

00:41:35.160 --> 00:41:35.400

Right.

332

00:41:37.860 --> 00:41:49.050

Whitney Quesenbery, Civic Design: So I think we're just I think the end result of this is two things one is that we are just going to sort of prefer dealing with this, because there's already an election in motion for which there's a secretary state rule.

333

00:41:49.920 --> 00:42:00.630

Whitney Quesenbery, Civic Design: To follow, and that will still backfill from that after we see how it goes, but the other is that just to say very clearly that this is a something on which there was.

334

00:42:01.710 --> 00:42:06.570

Whitney Quesenbery, Civic Design: You know, none of none of the definitions are really clear full term I guess is but.

335

00:42:07.020 --> 00:42:15.600

Whitney Quesenbery, Civic Design: Especially when the odd situation this year, where there's a kind of one month short term and then a full term after that it's not.

336

00:42:15.840 --> 00:42:24.870

Whitney Quesenbery, Civic Design: It and how do you make it clear that they're not that they don't overlap, where they do overlap, because the same candidates may appear on both of those contests so.

337

00:42:27.210 --> 00:42:28.950

Whitney Quesenbery, Civic Design: it'd be interesting for.

338

00:42:30.390 --> 00:42:43.350

Whitney Quesenbery, Civic Design: Everybody everybody for county election office to kind of flag for themselves, so this is something to listen for and what they hear from voters, because I think we're going to want input on whether it worked or didn't work cause problems or didn't cause problems.

339

00:42:47.580 --> 00:42:53.640

Natalie Adona: Whitney this is natalie again I put the link to that ccr via the chat if you want to refer to it.

340

00:42:56.160 --> 00:42:57.120

Let me bring it up.

341

00:43:05.700 --> 00:43:07.680

Whitney Quesenbery, Civic Design: So okay so here's the.

342

00:43:09.510 --> 00:43:11.520

Whitney Quesenbery, Civic Design: instructions of honors assisting.

343

00:43:14.190 --> 00:43:15.540

Whitney Quesenbery, Civic Design: got it Okay, so this is.

344

00:43:18.360 --> 00:43:19.290

Whitney Quesenbery, Civic Design: Not layout.

345

00:43:20.340 --> 00:43:22.440

Whitney Quesenbery, Civic Design: that the language is.

346

00:43:24.360 --> 00:43:28.080

Whitney Quesenbery, Civic Design: One for the regular six year term ending January 320 29.

347

00:43:29.220 --> 00:43:34.140

Whitney Quesenbery, Civic Design: And one for the remainder of the current term ending January 320 23 you may vote for both contest.

348

00:43:37.020 --> 00:43:37.410

Whitney Quesenbery, Civic Design: Does it.

349

00:43:39.990 --> 00:43:46.770

Whitney Quesenbery, Civic Design: So i'm trying to read it read and talk at the same time, does it actually say this is the notice that goes before that.

350

00:43:50.160 --> 00:43:52.260

Whitney Quesenbery, Civic Design: This is for the.

351

00:43:54.120 --> 00:44:00.570

Whitney Quesenbery, Civic Design: Information guide, but does it say what it should say here's a partial unexpired term in the okay.

352

00:44:02.250 --> 00:44:07.620

Natalie Adona: yeah So the first set of bolted language you saw is supposed to go on the ballot.

353

00:44:07.800 --> 00:44:09.300

Natalie Adona: yeah and.

354

00:44:09.690 --> 00:44:16.440

Natalie Adona: yeah and the other set of folded language is supposed to go into the instructions.

355

00:44:19.050 --> 00:44:22.140

Natalie Adona: Okay, whether this works or not for people I guess we'll.

356

00:44:24.300 --> 00:44:24.990

Natalie Adona: Find out.

357

00:44:25.410 --> 00:44:30.090

Whitney Quesenbery, Civic Design: And I guess it's also sort of suggesting a the use of.

358

00:44:33.630 --> 00:44:34.320

The go.

359

00:44:36.930 --> 00:44:40.260

Whitney Quesenbery, Civic Design: Partial partial and unexpired partial unexpired term for the Senate.

360

00:44:41.880 --> 00:44:43.740

Whitney Quesenbery, Civic Design: and full term as the two opposite.

361

00:44:45.210 --> 00:44:47.280

Whitney Quesenbery, Civic Design: The two opposite terminology.

362

00:44:49.140 --> 00:44:52.170

Whitney Quesenbery, Civic Design: Because they're also something in the in the.

363

00:44:53.460 --> 00:44:55.140

Whitney Quesenbery, Civic Design: label for the contest.

364

00:45:01.080 --> 00:45:02.130

Whitney Quesenbery, Civic Design: So are we.

365

00:45:03.630 --> 00:45:14.040

Whitney Quesenbery, Civic Design: Are we good with the idea of simply holding this up i'll add this as as a note, but I won't do it, while we're all sitting and watching to just say why we defer decision on it.

366

00:45:20.760 --> 00:45:21.060

Whitney Quesenbery, Civic Design: Great.

367

00:45:24.720 --> 00:45:27.480

Whitney Quesenbery, Civic Design: You see 6821 is also a.

368

00:45:28.710 --> 00:45:32.010

Whitney Quesenbery, Civic Design: update to lately, this is a.

369

00:45:35.370 --> 00:45:35.730

me.

370

00:45:39.630 --> 00:45:48.480

Whitney Quesenbery, Civic Design: instructions for a ballot, and this is the peace and freedom, parties instructions again normalize them to match 13 to a six done previously.

371

00:45:53.790 --> 00:45:57.120

Whitney Quesenbery, Civic Design: 13 to our 6.5 is another one of those.

372

00:45:58.500 --> 00:46:03.960

Whitney Quesenbery, Civic Design: Updating to match the language from previously in three different sections.

373

00:46:07.740 --> 00:46:09.780

Whitney Quesenbery, Civic Design: And then we get to columns.

374

00:46:11.070 --> 00:46:25.440

Whitney Quesenbery, Civic Design: The note that the committee had for the working group had was the tech scene fine, but they felt that it would be helpful to how a visual interpretation for interpretation of that and really agrees will will make one.

375

00:46:26.640 --> 00:46:39.150

Whitney Quesenbery, Civic Design: just pointing out, I mean I what i've been envisioning is that we take some of those sketches i've been doing, of what the ballot might look like match them up to meet the code sections and do call out saying which code section that thing is illustrating.

376

00:46:41.100 --> 00:46:42.630

Whitney Quesenbery, Civic Design: To the extent that we made a change.

377

00:46:47.520 --> 00:46:48.690

Whitney Quesenbery, Civic Design: So there's actually no.

378

00:46:50.190 --> 00:46:52.410

Whitney Quesenbery, Civic Design: there's no text changes here but um.

379

00:46:54.090 --> 00:47:00.000

Whitney Quesenbery, Civic Design: I know it's not always typical to have illustrations in code, but there are regulations that do have illustrations.

380

00:47:01.500 --> 00:47:18.030

Whitney Quesenbery, Civic Design: The federal accessibility guidelines do have diagrams to show distance reach reach distance and there's, so there are others that that exists in the people think that's a good idea to do and to try to include if if not in the code itself, then in the instructional.

381

00:47:20.400 --> 00:47:25.860

Whitney Quesenbery, Civic Design: The glossary the last material that goes along with it informational material that goes along with our recommendations.

382

00:47:33.240 --> 00:47:34.110

Hearing silence.

383

00:47:38.790 --> 00:47:45.390

Whitney Quesenbery, Civic Design: To Roy is voting targets and again there's a question for the committee here, and when that will probably have to take away.

384

00:47:47.610 --> 00:47:55.920

Whitney Quesenbery, Civic Design: This is a very long previous thing that actually it does not match any balance, it must be for a Punch card or or make a mark card.

385

00:47:57.510 --> 00:47:59.160

Whitney Quesenbery, Civic Design: That talks about things like.

386

00:48:00.510 --> 00:48:06.480

Whitney Quesenbery, Civic Design: Being in a right hand column, and having vertical lines printed to create a voting target that's a large Square.

387

00:48:08.070 --> 00:48:12.600

Whitney Quesenbery, Civic Design: So we just said, a vote in target to be printed excellent and with each voting option to replace that paragraph.

388

00:48:14.310 --> 00:48:31.170

Whitney Quesenbery, Civic Design: And here the other thing that was interesting was that it actually specified that the voting target may be at the half an inch wide, which is really huge certainly for anything you're filling in and that they may be, as tall as as required by the takes occupied by the title in summary.

389

00:48:34.020 --> 00:48:43.530

Whitney Quesenbery, Civic Design: So I did a little looking around at the federal voting system guidelines, because I thought they might be helpful and probably are things that.

390

00:48:44.160 --> 00:48:51.480

Whitney Quesenbery, Civic Design: Some of the voting systems are already using themselves and that the Federal vs G 2.0 the current version.

391

00:48:52.080 --> 00:49:00.960

Whitney Quesenbery, Civic Design: Seven to Jay says on a paper route that a voter marks by hand the area of the target use to mark a voting selection must be at least three millimeters that is.

392

00:49:01.470 --> 00:49:04.920

Whitney Quesenbery, Civic Design: 1.12 or an eighth of an inch across in any direction.

393

00:49:05.490 --> 00:49:15.060

Whitney Quesenbery, Civic Design: And we're suggesting that we start from the basis of let's match the federal voting system if there's no other compelling reason to do anything else, but we also thought that we have to ask everybody.

394

00:49:15.690 --> 00:49:21.120

Whitney Quesenbery, Civic Design: To check that this works for their voting system and then we're not inadvertently, creating a channel a problem there.

395

00:49:22.590 --> 00:49:32.850

susan lapsley: And we need this is Susan laughs Lee sorry I think what what we do need to double check is a California voting system standards which are different than the federal lens into.

396

00:49:33.360 --> 00:49:35.640

susan lapsley: The on the accessibility side, we are.

397

00:49:35.670 --> 00:49:37.770

susan lapsley: Much more stringent and.

398

00:49:38.250 --> 00:49:41.220

susan lapsley: Accessibility versus federal, and so I think on our side, so that's.

399

00:49:41.520 --> 00:49:42.000

susan lapsley: double check.

400

00:49:42.330 --> 00:49:50.010

Whitney Quesenbery, Civic Design: yeah so let's let's check that I mean let's find a number that matches the kind of targets we have now and let's make sure that it matches.

401

00:49:51.570 --> 00:49:53.100

Whitney Quesenbery, Civic Design: Well, presumably if it's in the.

402

00:49:54.330 --> 00:49:58.140

Whitney Quesenbery, Civic Design: State standards it's probably in all the voting systems, but let's double check all that.

403

00:49:59.250 --> 00:50:00.900

Whitney Quesenbery, Civic Design: can make sure it's it's right so.

404

00:50:02.430 --> 00:50:06.840

susan lapsley: And once again as a takeaway obviously I can double check for that, for the group and get back to you.

405

00:50:07.260 --> 00:50:11.640

Whitney Quesenbery, Civic Design: Great thanks, and it is a minimum, so it doesn't say anything what how large or can be.

406

00:50:16.110 --> 00:50:25.770

Whitney Quesenbery, Civic Design: Great and if anybody has a voting system you think is a problem, getting exorcism and make sure that we get this straight, now we don't inadvertently invalidate somebody's voting system what by just picking the wrong number.

407

00:50:32.190 --> 00:50:43.800

Whitney Quesenbery, Civic Design: The next One was about columns and visual indicators and it took us a long time to get through this and to understand what it was saying, but we think what it's saying is that.

408

00:50:44.970 --> 00:50:51.540

Whitney Quesenbery, Civic Design: The candidates for political office over printed immediate succession, the group she'll be in order, you know and that.

409

00:50:52.770 --> 00:51:03.270

Whitney Quesenbery, Civic Design: It requires them to avoid unnecessary spacing or gaps in the sequence I sounds like a good idea, so that people don't get a false bottom or think they're done, but the.

410

00:51:04.290 --> 00:51:11.100

Whitney Quesenbery, Civic Design: text of being see we thought was pretty confusing and so we've tried to straighten it out to simply say.

411

00:51:11.550 --> 00:51:25.050

Whitney Quesenbery, Civic Design: it's acceptable leave spaces on the ballot in order to keep an entire contest together in a single column or page or to match the arrangement of contests or to manage the arrangement of contest and the on the ballot, so that you can use spacing.

412

00:51:26.250 --> 00:51:27.720

Whitney Quesenbery, Civic Design: preferably at the bottom of the line.

413

00:51:28.740 --> 00:51:45.270

Whitney Quesenbery, Civic Design: To make sure that the that the general intent here, which is that the contest appear in success in a regular order work and then, when a ballot has multiple pages or cards and instruction she'll be printed direct the voter to continue to the next page your card.

414

00:51:46.560 --> 00:52:01.800

Whitney Quesenbery, Civic Design: This is already in there and we see balance that are using it we're using pages to me aside and we talked about using sheets instead of cards, but cards is the word that's used pretty much everywhere in the code and it seemed like an acceptable way to do it.

415

00:52:03.300 --> 00:52:08.490

Whitney Quesenbery, Civic Design: Has sheets tends to refer to us like a thin piece of paper and ballots are not always not thin.

416

00:52:10.800 --> 00:52:14.070

Whitney Quesenbery, Civic Design: So this is where we This is where we got to on that and I think.

417

00:52:15.360 --> 00:52:22.620

Whitney Quesenbery, Civic Design: This is a good time to pause and already read it, and think about whether there's anything in here that's still confusing enough that we should fix it or that we've left out.

418

00:52:23.640 --> 00:52:33.030

Whitney Quesenbery, Civic Design: A situation in which you might manipulate the spacing on the on the ballot presentation in a way that wouldn't be covered by what we said.

419

00:52:52.950 --> 00:52:57.570

Whitney Quesenbery, Civic Design: And I guess one question that we raised was should we say leave spaces at the bottom of a column.

420

00:52:58.650 --> 00:53:13.410

Whitney Quesenbery, Civic Design: or end of a page and be very specific about that, or do we leave it as just a little bit looser, as indeed it is in the current text to not boxes into much, and I see raise your hand.

421

00:53:17.370 --> 00:53:29.190

Annette Lim: Regarding that sometimes you might because of the whole vibe the wonderful dinner in a voting target, you might have to not have all state of the bottom.

422

00:53:31.110 --> 00:53:33.600

Whitney Quesenbery, Civic Design: Wait say that again because of the I missed the very beginning, so.

423

00:53:33.630 --> 00:53:35.730

Annette Lim: When you when you have to fold the ballot.

424

00:53:36.030 --> 00:53:41.070

Annette Lim: Oh mail out you don't want any phone lines to go through voted and target.

425

00:53:42.090 --> 00:53:42.510

Annette Lim: So.

426

00:53:42.780 --> 00:53:46.170

Annette Lim: Right have to play with some of the spacing not always at the bottom.

427

00:53:46.680 --> 00:53:47.910

Whitney Quesenbery, Civic Design: that's a good reason to leave it.

428

00:53:55.140 --> 00:54:03.660

REINA MILLER: Whitney there was also a comment from Kim I think direction know earlier that ballot parts can be two sided not sure that was included.

429

00:54:12.510 --> 00:54:12.870

Whitney Quesenbery, Civic Design: well.

430

00:54:15.210 --> 00:54:27.600

Whitney Quesenbery, Civic Design: A two sided valid card has two pages, where we were using the word, so if you're turning turning the card over that's a page and if you're picking up another physical piece of paper cardboard that's that's a card.

431

00:54:39.840 --> 00:54:41.400

Natalie Adona: And I think you know just a.

432

00:54:43.080 --> 00:54:44.610

Natalie Adona: Just for my own part.

433

00:54:46.020 --> 00:54:56.520

Natalie Adona: You know when when I when I refer to a valid card, it could be one page, or it could be two pages i'm never going to not print two sided.

434

00:54:56.850 --> 00:55:06.120

Natalie Adona: Right, if I can, if I can help it right, I mean know whether or not that needs to be included, you know, specifically in the code I don't know.

435

00:55:08.820 --> 00:55:11.280

Natalie Adona: I don't know if anyone has had a problem.

436

00:55:12.300 --> 00:55:12.690

Natalie Adona: That.

437

00:55:13.170 --> 00:55:14.310

Whitney Quesenbery, Civic Design: I don't think so, I think that to.

438

00:55:14.310 --> 00:55:16.470

Whitney Quesenbery, Civic Design: Say that I got the page and card.

439

00:55:18.090 --> 00:55:36.000

Whitney Quesenbery, Civic Design: terminology from back when we were when some people have went to a two card ballot for the first time and we're trying to figure out how to distinguish between you know, is it page if they're two cards is it page one or four or is it page one, or is it card one of two and.

440

00:55:40.080 --> 00:55:45.900

Whitney Quesenbery, Civic Design: You know the discussion of what you know what about what about understand that if we're going to use that terminology, and so this is a chance to sort of.

441

00:55:46.560 --> 00:55:55.860

Whitney Quesenbery, Civic Design: Just echo that terminology, but being really clear that it might be the bottom of one face one physical side of something, but it might be when you're shifting objects as well.

442

00:55:57.030 --> 00:55:57.450

Whitney Quesenbery, Civic Design: sure.

443

00:56:01.740 --> 00:56:06.480

Whitney Quesenbery, Civic Design: That, in some way they don't think it matters as long as we're consistent about what we call them great.

444

00:56:07.980 --> 00:56:14.100

Raj Bathla: Just to just to clarify natalie so according to you, page is a next card right a second card.

445

00:56:14.580 --> 00:56:18.540

Natalie Adona: No, no, a page is one side of a card.

446

00:56:19.590 --> 00:56:21.000

Whitney Quesenbery, Civic Design: yeah I agree with you.

447

00:56:21.840 --> 00:56:32.520

Natalie Adona: Okay, so if I have a two if I have a two page ballot, it could be on one card, and you know we would print on the ballot, you know page one of two, I think.

448

00:56:32.940 --> 00:56:41.130

Natalie Adona: And you know, we would have instructions that say you know go to the next page, we also have instructions indicating where the bout has ended.

449

00:56:43.140 --> 00:56:43.650

So.

450

00:56:45.060 --> 00:57:00.090

Whitney Quesenbery, Civic Design: Okay, and if you had a three page card a three page ballot, it would be page one of three page two or three and one might say, turn the turn over and the other might say, go to the next one i'm trying not to be too precise about those words.

451

00:57:01.350 --> 00:57:01.680

Natalie Adona: yeah.

452

00:57:03.780 --> 00:57:05.310

Whitney Quesenbery, Civic Design: yeah that's that's what I would understand.

453

00:57:06.510 --> 00:57:08.850

Whitney Quesenbery, Civic Design: But I wrote this so I guess you were in discussion.

454

00:57:11.610 --> 00:57:15.570

Annette Lim: also had a blank page page intentionally left blank.

455

00:57:16.350 --> 00:57:18.180

Whitney Quesenbery, Civic Design: Remember that's right.

456

00:57:19.740 --> 00:57:27.540

Whitney Quesenbery, Civic Design: And I think we had this page intentionally left blank in some of the 34 candidates for senate in a primary it would only be in a primary.

457

00:57:28.200 --> 00:57:37.560

Whitney Quesenbery, Civic Design: Where it didn't fit on the first page of the ballot because of the header and if it was a NPP there was no contest on the first page and I have to go straight to the second page.

458

00:57:41.040 --> 00:57:43.620

Whitney Quesenbery, Civic Design: there's nothing crazy that hasn't happened, I mean.

459

00:57:46.680 --> 00:57:50.220

Whitney Quesenbery, Civic Design: I don't I think i'll know that'll never happen and then next week I hear about it somewhere.

460

00:57:52.320 --> 00:57:55.230

Whitney Quesenbery, Civic Design: anybody else have comments on this before we before we jump ahead.

461

00:58:00.360 --> 00:58:11.640

Whitney Quesenbery, Civic Design: Oh, this is a really funny one the the texts that got into the into the code actually chopped off the end of the sentence and so we're simply noting that to restore the text, it must have happened in the legislative process.

462

00:58:17.700 --> 00:58:19.410

Whitney Quesenbery, Civic Design: and so on, we go to.

463

00:58:21.360 --> 00:58:23.130

Whitney Quesenbery, Civic Design: Which is the beginning of stubs.

464

00:58:24.240 --> 00:58:30.990

Whitney Quesenbery, Civic Design: we're just trying to remove Texas really specific to the format of a Punch card system.

465

00:58:32.250 --> 00:58:37.380

Whitney Quesenbery, Civic Design: So we simply change change to say that if a voting system includes stubs on, but when we are balance.

466

00:58:38.490 --> 00:58:41.130

Whitney Quesenbery, Civic Design: On each of the valid horizontal lunch we'll roll.

467

00:58:44.220 --> 00:58:49.050

Whitney Quesenbery, Civic Design: This in small type of home this number should be turned off by priests and board member had motor.

468

00:58:50.100 --> 00:59:00.030

Whitney Quesenbery, Civic Design: And the words I voted, have you taking them out of context so we've said we didn't change us, we simply changes from being shouting capitals and then.

469

00:59:01.110 --> 00:59:17.130

Whitney Quesenbery, Civic Design: bell itself is not required if the information listed in subdivisions, a Christian subdivision a presented to the voter is presented to vote or on a separate form handling the ballot, so if your instructions or something that's not on the ballot itself include the instructions to.

470

00:59:18.150 --> 00:59:22.080

Whitney Quesenbery, Civic Design: tear off a Stub and you have a Stub, then you don't have to put it on the Stub itself.

471

00:59:25.260 --> 00:59:29.370

Whitney Quesenbery, Civic Design: But it provides keeps the keeps the words that are already use.

472

00:59:36.750 --> 00:59:46.980

Maria Valadez: Maria clay county I have a question when you are remembering these things, I see that he is completely going to be removed, so then would see become be.

473

00:59:47.640 --> 00:59:50.490

Whitney Quesenbery, Civic Design: I believe it will, when it's really prepared for.

474

00:59:51.840 --> 00:59:52.140

yeah.

475

00:59:53.250 --> 01:00:03.270

Whitney Quesenbery, Civic Design: We just thought it was really it was too complicated to say wait in the in the old be we think we should leave it and then the new see that someone trying to compare this to the to the code would have an easier time with it, if we just left.

476

01:00:11.340 --> 01:00:24.420

Whitney Quesenbery, Civic Design: municipal elections there's just one change here, which is that the designation of office in any other words required to be at the top of the contest rather than have a single column should be printed across the entire double column, this is for.

477

01:00:25.620 --> 01:00:41.670

Whitney Quesenbery, Civic Design: You know why it's just a municipal elections, it must be that it's somewhere else as well, but it's for situations in which there are too many candidates to fit in a single column, and they have to spend two columns We know this is a problem for voters and.

478

01:00:44.640 --> 01:00:48.870

Whitney Quesenbery, Civic Design: We said we just changed it to say at the top of the contest, will the top of a single column.

479

01:00:51.690 --> 01:00:52.050

Whitney Quesenbery, Civic Design: i'm.

480

01:00:54.900 --> 01:00:57.060

Whitney Quesenbery, Civic Design: not sure it's necessary but it seemed.

481

01:01:05.220 --> 01:01:09.090

Dave Haines: Whitney this is Dave hands, could we jump back up to 216 that.

482

01:01:10.320 --> 01:01:13.530

Dave Haines: That first line in that paragraph doesn't make any.

483

01:01:15.480 --> 01:01:16.710

Dave Haines: sense to me.

484

01:01:17.850 --> 01:01:25.440

Dave Haines: It talks about the same number appearing on the Stub she'll be printed above the horizontal line solid line on the left side of the bow.

485

01:01:27.660 --> 01:01:30.300

Dave Haines: What number are they talking about the serial number.

486

01:01:32.370 --> 01:01:34.830

Whitney Quesenbery, Civic Design: Save you print ballots, you probably know more than I do.

487

01:01:35.340 --> 01:01:39.810

Dave Haines: Why, I know what we do, but that the this rule doesn't.

488

01:01:41.070 --> 01:01:44.340

Dave Haines: It has always bothered me, frankly, because it it's not clear.

489

01:01:49.410 --> 01:01:51.090

Whitney Quesenbery, Civic Design: What do you think it is and what do you think.

490

01:01:51.120 --> 01:01:53.670

Whitney Quesenbery, Civic Design: It should it's trying to say, should we start with that.

491

01:01:56.790 --> 01:01:59.700

James Lasby: And I think it's boring to the ballot height.

492

01:02:05.070 --> 01:02:07.710

Natalie Adona: I think it is a serial number, if I remember I.

493

01:02:08.340 --> 01:02:23.760

Karen Rhea: Remember, when we have devil stubs and and the other question I have is if the voting system includes stubs on vote by mail balance we still have counties that order pulled out because it's about the letter surrenders it and boats at the polls, they have.

494

01:02:23.970 --> 01:02:28.170

Karen Rhea: yeah well, please format that is padded with a separate session.

495

01:02:28.650 --> 01:02:40.920

Whitney Quesenbery, Civic Design: I believe this section is in the vote by mail section, in which case if we decide to make a change we're going to have to search it down in the non vote by mail section and either consolidate the two sections.

496

01:02:40.950 --> 01:02:42.690

Whitney Quesenbery, Civic Design: or or duplicate it.

497

01:02:44.940 --> 01:02:46.560

Whitney Quesenbery, Civic Design: But good point again, thank you.

498

01:02:49.470 --> 01:02:59.040

Dave Haines: yeah for vote by mail ballots we either have no Stub or we have ones we don't have to stubs on any of the balance that we print there's never two stubs on a boat by matt about it.

499

01:03:01.080 --> 01:03:03.360

Whitney Quesenbery, Civic Design: i'm really open to suggestions, because I.

500

01:03:04.500 --> 01:03:05.100

Whitney Quesenbery, Civic Design: It seems like.

501

01:03:05.370 --> 01:03:06.630

Whitney Quesenbery, Civic Design: It seems very detailed.

502

01:03:06.690 --> 01:03:16.530

Whitney Quesenbery, Civic Design: about exactly what to do and non solid world lines, and I would love if it was simpler, because I love everything to be simpler, but I don't want to simplify it in a way that makes trouble so.

503

01:03:17.970 --> 01:03:21.000

James Lasby: Any any suggestions, people have had to edit This is our.

504

01:03:21.210 --> 01:03:26.610

Whitney Quesenbery, Civic Design: very much welcome, because I think this is beyond my maybe not my expertise, but my detailed knowledge of California.

505

01:03:28.740 --> 01:03:32.730

Natalie Adona: i'm an advocate of just getting rid of the user steps, all together, but that's just me.

506

01:03:33.900 --> 01:03:35.010

Natalie Adona: telling anyone what to do.

507

01:03:37.410 --> 01:03:39.330

James Lasby: I mean quickly just say stuff they're off.

508

01:03:39.810 --> 01:03:40.410

Whitney Quesenbery, Civic Design: To what.

509

01:03:45.330 --> 01:03:52.560

Dave Haines: Well Whitney I can take a stab at this offline and send you some thoughts on any way on, but I just.

510

01:03:54.000 --> 01:04:02.640

Dave Haines: was a as you went past it, I was reading it, and it that lion has never made any sense to me so as long as you're cleaning things up, I think we should click that what.

511

01:04:02.700 --> 01:04:04.020

Whitney Quesenbery, Civic Design: We should definitely clean that up.

512

01:04:05.310 --> 01:04:20.490

Whitney Quesenbery, Civic Design: And I would really welcome, I mean I think being you know, requiring that be a non solid rule line on the left side of the ballot, I mean this is just a little crazy and specific like they were describing and existing style a ballot, rather than a functional description.

513

01:04:21.870 --> 01:04:22.170

Dave Haines: Right.

514

01:04:24.780 --> 01:04:24.990

Dave Haines: that's.

515

01:04:25.170 --> 01:04:30.060

REINA MILLER: Common to pin commented or worried about voters will think they should get

one.

516

01:04:30.450 --> 01:04:46.860

REINA MILLER: Joanna commented, I believe the law was recently changed to add vote by mail language, and this, it seemed to make things more confusing and John commented keep stuff optional help with printer issues and how they cut valid states can explain.

517

01:04:47.880 --> 01:04:52.980

REINA MILLER: And Richard commented, without the how does one account for the original ballad printed.

518

01:05:02.970 --> 01:05:05.070

James Lasby: I'm just adding the comments here, so we don't lose them.

519

01:05:06.330 --> 01:05:07.110

Whitney Quesenbery, Civic Design: No, I can't.

520

01:05:13.590 --> 01:05:15.450

Natalie Adona: You can't copy and paste the comments.

521

01:05:19.470 --> 01:05:19.710

REINA MILLER: yeah.

522

01:05:19.800 --> 01:05:20.340

Natalie Adona: I mean.

523

01:05:20.370 --> 01:05:20.760

REINA MILLER: What am I.

524

01:05:20.820 --> 01:05:21.930

Natalie Adona: My own part, and what.

525

01:05:23.490 --> 01:05:25.860

Natalie Adona: Just for my own part, while we're waiting.

526

01:05:26.160 --> 01:05:28.740

Natalie Adona: You know, we we keep an inventory of all of our ballot.

527

01:05:28.740 --> 01:05:39.930

Natalie Adona: paper, and it has a very specific Count of how much we distribute to each voting location and workers are expected to balance.

528

01:05:39.990 --> 01:05:44.070

James Lasby: At the end of each night, so the stubs are not necessary.

529

01:05:45.150 --> 01:05:45.540

James Lasby: In.

530

01:05:45.690 --> 01:05:47.070

Natalie Adona: In our use of.

531

01:05:47.100 --> 01:05:50.160

Whitney Quesenbery, Civic Design: yeah i've never voted on a ballot with a Stub just to say it.

532

01:05:53.280 --> 01:05:55.320

Natalie Adona: By hand and they get stuck everywhere.

533

01:05:56.580 --> 01:05:58.830

Natalie Adona: I don't like stubs but.

534

01:06:00.720 --> 01:06:01.530

Natalie Adona: Not what we're here for.

535

01:06:20.940 --> 01:06:31.410

Whitney Quesenbery, Civic Design: yeah I guess why I voted to Brian I said I voted sounds like in person language, it also sounds like I know that there's some systems where there is.

536

01:06:32.220 --> 01:06:37.440

Whitney Quesenbery, Civic Design: A Stub on the ballot and the I voted sticker is attached to it for them to take off and it sounds like a sort of.

537

01:06:37.830 --> 01:06:45.780

Whitney Quesenbery, Civic Design: I voted sticker without it being a sticker which kind of doesn't make quite so much sense because about by mail people like to get seekers like in person, people like to get stickers.

538

01:06:55.710 --> 01:07:10.080

Whitney Quesenbery, Civic Design: So do we, I mean look, as can be I mean, I think we all welcome some clarifying language so that this makes sense, when we look at it, and nobody is confused by what this is trying to say whether they were election official aren't interested citizen.

539

01:07:11.340 --> 01:07:12.930

Whitney Quesenbery, Civic Design: Member of the public, but.

540

01:07:13.980 --> 01:07:29.040

Whitney Quesenbery, Civic Design: I guess the question I have is, do we want to discuss whether the committee wants to recommend, even if not with specific text here, but just recommend in general that stuff's I mean steps are often are made optional there's a lot of.

541

01:07:30.480 --> 01:07:38.460

Whitney Quesenbery, Civic Design: valid sub is not required if statements throughout the code, if we can, if we do want to just say stubs are optional if they're helpful for election administration.

542

01:07:39.480 --> 01:07:47.340

Whitney Quesenbery, Civic Design: And then look at any reference to stop and see if there's anything where you know, is it really required that we say the words I have voted.

543

01:07:47.640 --> 01:07:55.530

Whitney Quesenbery, Civic Design: So you are listening this number she'll be torn off by precinct board official and handed to the road or I mean are those which also sounds like in person So are we.

544

01:07:57.690 --> 01:08:06.060

Whitney Quesenbery, Civic Design: You know, are we over specifying what should be on the Stub of a ballot and is that something that committee wants to sort of consider consider.

545

01:08:08.430 --> 01:08:13.410

Dave Haines: Well, just for clarity just, from my perspective, as a producer of ballots and mail.

546

01:08:14.820 --> 01:08:31.200

Dave Haines: The purpose of the stuff from our perspective is to create that perfect match so that that's how we assure using identification on that Stub and an identification on the envelope that the that the package going to the voter is perfect.

547

01:08:32.400 --> 01:08:47.160

Dave Haines: And we do use a Stub or we use what we call rap but either one is a separate piece of paper that has various information on it, I agree that specifically saying what it has to say on it that's might be.

548

01:08:48.450 --> 01:08:57.990

Dave Haines: Unnecessary, I have voted, have you is that really necessary to be on the Stub I I won't weigh in on that, but, but that is the purpose of the stuff it's not.

549

01:08:59.070 --> 01:09:08.400

Dave Haines: So I I don't see them being eliminated in any kind of an automated process of fully automated process but.

550

01:09:11.190 --> 01:09:20.190

Dave Haines: They certainly the like, I say this instruction by itself just doesn't make sense, because I didn't forget that there's a number on the ballot which there isn't that's.

551

01:09:22.860 --> 01:09:27.810

Dave Haines: My problem with it, but that's my two cents, the the stubs are.

552

01:09:28.830 --> 01:09:29.940

Dave Haines: Part of the process.

553

01:09:30.360 --> 01:09:32.310

Whitney Quesenbery, Civic Design: What if we see something like.

554

01:09:34.200 --> 01:09:36.240

Whitney Quesenbery, Civic Design: stone we use on the ballot to.

555

01:09:38.040 --> 01:09:48.450

Whitney Quesenbery, Civic Design: i'm not going to try to work it like that, so so we used to make administration to address administration needs, but that should be designed to meet that purpose.

556

01:09:50.340 --> 01:09:50.580

James Lasby: yep.

557

01:09:55.050 --> 01:10:04.830

Natalie Adona: I think Joanna Joanna made a comment in the chat and I think she's right that there, there were at least from from my memory when when I had to deal with stubs well way back when.

558

01:10:05.520 --> 01:10:20.520

Natalie Adona: Two purposes for the stubs and one of them was administrative I mean it's just easier to balance the end of the night because you know how how many are in a pack, and if you have this pack of stabled stubs you know how much you went through but also.

559

01:10:21.600 --> 01:10:34.410

Natalie Adona: You know, there was a time when you know we would give this stuff to the voter and say you know if you know your employer tries to retaliate against you and say that you did not vote when you did you will have evidence that that you went to vote in person.

560

01:10:36.030 --> 01:10:38.910

Natalie Adona: Now, whether or not you need those on a vote by mail or no.

561

01:10:42.030 --> 01:10:42.720

it's interesting.

562

01:10:44.130 --> 01:10:52.890

Dave Haines: yeah this this section is specifically about vote by mail because you're on pull ballots those do get to stubs.

563

01:10:54.090 --> 01:10:59.310

James Lasby: For this, for all of our customers and they're used for the executive that purpose of reconciling at the end of the.

564

01:10:59.310 --> 01:10:59.640

night.

565

01:11:03.180 --> 01:11:03.570

Just.

566

01:11:10.260 --> 01:11:18.360

Whitney Quesenbery, Civic Design: um yeah I mean i'd be in favor of of of all of what we just said, I mean it sounds sounds like a sensible solution to allowing.

567

01:11:20.430 --> 01:11:26.070

Whitney Quesenbery, Civic Design: Mr automation needs for tracking needs for administration but not trying to treat it as a.

568

01:11:28.890 --> 01:11:35.910

Whitney Quesenbery, Civic Design: I mean, I suppose the valid could include something that indicates that it's from voting, but unable to your employer really know anyway.

569

01:11:39.750 --> 01:11:42.300

Whitney Quesenbery, Civic Design: Thanks day for racing that's quite helpful.

570

01:11:46.830 --> 01:11:48.960

Whitney Quesenbery, Civic Design: anybody else before we before we plunge ahead.

571

01:11:53.850 --> 01:11:55.500

Whitney Quesenbery, Civic Design: And I will punch ahead.

572

01:11:56.790 --> 01:12:01.590

Whitney Quesenbery, Civic Design: With just talked about that anyway, but we stopped before we give everybody a chance to common.

573

01:12:14.460 --> 01:12:23.940

Whitney Quesenbery, Civic Design: sense there's a whole section that we just think should be eliminated, and that is the entire section on much of the entire section on punch cards.

574

01:12:25.320 --> 01:12:36.150

Whitney Quesenbery, Civic Design: I suppose 60 probably is included in there, but just let's we're not doing punch cards anymore, so we can just I think this cannot be removed, we looked at them, we did look through them.

575

01:12:39.150 --> 01:12:43.470

Whitney Quesenbery, Civic Design: And then we move into some odd things that got added to near the end so.

576

01:12:45.570 --> 01:12:56.280

Whitney Quesenbery, Civic Design: One is 1444 14434443 if balancer counted, by means of electronic loan amount of which took out a Punch card device.

577

01:13:00.120 --> 01:13:03.330

Whitney Quesenbery, Civic Design: duplication for Kansas in 15 to 11.

578

01:13:09.270 --> 01:13:25.950

Whitney Quesenbery, Civic Design: This basically says that you have to duplicate onto a Punch card, but up above there's a whole separate section about duplication, that we looked at earlier, which is 15 to 10 and I think, which is what we're just looking at them here.

579

01:13:27.720 --> 01:13:35.010

Whitney Quesenbery, Civic Design: is simply for punch cards and I don't see any reason that I don't think that we need both of them.

580

01:13:40.260 --> 01:13:53.250

Whitney Quesenbery, Civic Design: Because this is really if you're using a optical scan you can put it on a Punch card and count them but that's that's nobody's nobody's verifying nobody has punch cards so we're not verifying punch punch.

581

01:13:59.100 --> 01:14:06.600

Whitney Quesenbery, Civic Design: Picking up one of the comments, a few times that I got to from Richard, that is, this should just say the elections official.

582

01:14:08.010 --> 01:14:10.440

Whitney Quesenbery, Civic Design: Because that's the term that seemed fine.

583

01:14:42.390 --> 01:14:45.390

Whitney Quesenbery, Civic Design: So that's just a little catch up change for definitions.

584

01:14:52.500 --> 01:15:02.790

Whitney Quesenbery, Civic Design: We were not sure if be actually can be a remove it applies only to dairies and we wondered if any of this is relevant we're.

585

01:15:03.690 --> 01:15:14.790

Whitney Quesenbery, Civic Design: Moving punch card, but are there any vote by mail ballots cast on the director party election electronic voting system at the office of an election officials or the satellite location.

586

01:15:16.260 --> 01:15:20.550

Whitney Quesenbery, Civic Design: Because if there are no longer such a thing, then this whole section can go yes.

587

01:15:20.820 --> 01:15:23.220

Christopher Neubauer: And there shouldn't be any dairies left in the state.

588

01:15:27.840 --> 01:15:30.870

Whitney Quesenbery, Civic Design: that's what we thought was just that way to ask here.

589

01:15:32.940 --> 01:15:33.870

Whitney Quesenbery, Civic Design: And then.

590

01:15:35.700 --> 01:15:43.380

Whitney Quesenbery, Civic Design: We just removed by means of a Punch punch card ordering system or by to just be an electronic or electromechanical what titling devices.

591

01:15:46.020 --> 01:15:47.370

Whitney Quesenbery, Civic Design: And that is it.

592

01:15:52.410 --> 01:15:53.010

Karen Rhea: wow.

593

01:15:53.220 --> 01:15:54.930

yeah we didn't get the definitions.

594

01:15:55.950 --> 01:15:56.580

But I.

595

01:15:57.660 --> 01:16:06.090

Whitney Quesenbery, Civic Design: am mindful of leaving time for public comment at the end, because we have this 15 minutes left and so maybe we should.

596

01:16:07.440 --> 01:16:08.520

Whitney Quesenbery, Civic Design: Thanks Kim I see that.

597

01:16:09.780 --> 01:16:11.550

Maybe we should turn this back over to.

598

01:16:14.070 --> 01:16:14.550

Right so.

599

01:16:17.580 --> 01:16:29.340

REINA MILLER: If you wouldn't need so before we do, that is, are there any other, can I just get a little recap on plan, just so i'm clear, we will bring this back for the next meeting.

600

01:16:29.910 --> 01:16:40.170

REINA MILLER: But will the working group go back and review after public after we hear public comment as well, and then kind of come back to this next time is that my understanding.

601

01:16:40.950 --> 01:16:42.300

Natalie Adona: Did that's right right now.

602

01:16:43.500 --> 01:16:53.550

Natalie Adona: My my understanding was we would sort of have time to play a printed out all of the comments from from from Richard, thank you very much and.

603

01:16:54.180 --> 01:17:05.610

Natalie Adona: i'll get a chance to read them and then we can sort of go back to the definitions and from there, I think we decided whether or not to adopt some or all of this document, as our right.

604

01:17:06.450 --> 01:17:13.020

REINA MILLER: You something we'll leave it at the end and we last time, at least we adopted it all at once, so maybe we can just put it as an item for next time.

605

01:17:13.350 --> 01:17:19.950

REINA MILLER: And then, are there any additional agenda topics that the committee would like for next time, or should we just leave it on.

606

01:17:20.520 --> 01:17:21.600

Whitney Quesenbery, Civic Design: Right now, have we covered all.

607

01:17:21.600 --> 01:17:23.250

Whitney Quesenbery, Civic Design: The points within the email.

608

01:17:25.440 --> 01:17:34.560

Whitney Quesenbery, Civic Design: I think we have because they were just out of the comments on the on the file, but I want to make sure we didn't have something we wanted to ask and didn't ask it.

609

01:17:40.110 --> 01:17:51.690

Whitney Quesenbery, Civic Design: let's see valid definition about label duplication talked about that length of term voting targets, we talked about that and manual talent, we talked about that, so I think we have gotten all the questions.

610

01:17:53.850 --> 01:18:10.560

REINA MILLER: Great so then let's a lot of time for public comments so Richard if you would like to maybe recap, I know everyone's going to take the time to read it, but maybe recap any important things that we that they should know before they go back and discuss this is a good time for that.

611

01:18:15.150 --> 01:18:23.190

REINA MILLER: Oh, and I see your comment caring about edit adding section 13109 the committee's okay with that we can add that next time.

612

01:18:26.010 --> 01:18:27.330

Whitney Quesenbery, Civic Design: What is that what is that one right.

613

01:18:28.380 --> 01:18:28.530

Karen Rhea: i'm.

614

01:18:29.010 --> 01:18:36.090

Karen Rhea: Sorry, all the headings, where they were mixing contest versus category like United States Senator.

615

01:18:36.180 --> 01:18:39.450

Whitney Quesenbery, Civic Design: Oh yes, yes you're right yep.

616

01:18:56.970 --> 01:19:00.780

Natalie Adona: So he's still here but he's muted, or maybe he got up for a second.

617

01:19:05.100 --> 01:19:06.690

REINA MILLER: So maybe okay.

618

01:19:08.040 --> 01:19:16.320

REINA MILLER: Maybe he's chatting more Is there anyone else that has any public comments or any agenda topics that they would like for next time Oh, can I see your hand go ahead.

619

01:19:16.890 --> 01:19:27.540

Kim Alexander: yeah thanks um Thank you so much for everyone's hard work on this, I know this is super tedious and thank you so much Whitney for for applying through all that I just was wondering about.

620

01:19:28.500 --> 01:19:43.770

Kim Alexander: about marketing devices and particularly the visa system which you probably all remember the La county was sued right before the march 2020 primary by beverly hills mayoral candidate that was in fifth place and they're.

621

01:19:43.770 --> 01:19:44.520

Whitney Quesenbery, Civic Design: Only for.

622

01:19:44.970 --> 01:19:51.030

Kim Alexander: Candidate showing I don't remember how the lawsuit worked out, but it seems like you know we're going to give all this guidance.

623

01:19:51.450 --> 01:20:04.560

Kim Alexander: about how to treat candidates fairly on a paper ballot, we probably should give a little thought to how we're going to address that equity for candidate visibility to voters and a bmd.

624

01:20:06.270 --> 01:20:10.680

Kim Alexander: ballot situation as well, so I don't have an answer, but hopefully you guys good.

625

01:20:12.210 --> 01:20:16.590

Whitney Quesenbery, Civic Design: To give that some thought to that's actually a good idea la I mean.

626

01:20:17.670 --> 01:20:23.700

Whitney Quesenbery, Civic Design: la certainly had some experience with what they did, and whether it worked to let my theory of the starting point yeah.

627

01:20:26.340 --> 01:20:33.540

Kim Alexander: yeah when you have, and I mean you have to kind of balance that the advantages of the ballot marketing advice, making being able to make the.

628

01:20:34.350 --> 01:20:49.680

Kim Alexander: Type very large and providing multiple languages, but then you had candidates saying well you know, there are only four candidates showing on the first green and our guy was number five and that wasn't fair to us so maybe there needs to be rotation or something like that too.

629

01:20:50.130 --> 01:21:01.770

Whitney Quesenbery, Civic Design: yeah there were some design things that i've seen done where instead of cutting off between the candidates it cuts off in the middle of a kind of a line so that you can see that there's more right.

630

01:21:03.090 --> 01:21:19.440

Whitney Quesenbery, Civic Design: And I think the other, the other issue, and this, this is labs it gets into the certification issues is that part of the problem is that from way back in the tg DC version one everything had to be paid without scrolling and there are.

631

01:21:21.210 --> 01:21:29.220

Whitney Quesenbery, Civic Design: The SG now allows scrolling as long as you don't have to as long as there's a means other than a gesture to do it, and so there are some.

632

01:21:30.480 --> 01:21:37.980

Whitney Quesenbery, Civic Design: Broader ways, but I think it raises questions that have to be resolved, not just in the code, but also in the voting system standards.

633

01:21:39.270 --> 01:21:45.540

Kim Alexander: I wanted to also flag remote accessible vote by mail ballots, which may be also need to be considered.

634

01:21:46.620 --> 01:21:50.760

somewhere along the line and how those are laid out for for voters.

635

01:21:51.840 --> 01:21:53.220

Whitney Quesenbery, Civic Design: who are using systems.

636

01:21:55.170 --> 01:21:55.980

Whitney Quesenbery, Civic Design: Oh thanks you guys.

637

01:21:57.180 --> 01:21:57.480

yeah.

638

01:22:00.630 --> 01:22:08.490

Whitney Quesenbery, Civic Design: Again i'm just going to flag this for this episode staff that the that this might overlap with certification questions and.

639

01:22:09.450 --> 01:22:22.620

Whitney Quesenbery, Civic Design: And and or so the certification guidelines themselves might have text that could be either just referred to here or could be incorporated, if that made sense as a help to do it.

640

01:22:24.270 --> 01:22:27.150

Whitney Quesenbery, Civic Design: I know we're not trying to refactor the entire election code.

641

01:22:27.360 --> 01:22:35.190

Whitney Quesenbery, Civic Design: But we do have a lot of things that are a lot of places where you keep wanting to I keep wanting to say, can we bring us all together and say on this kind of valid on the that kind of valid all that kind of valid.

642

01:22:35.610 --> 01:22:45.090

Whitney Quesenbery, Civic Design: and make sure that we're grouping them under one intent, but I think for right now, we agreed that the best we could do was to make sure the text was consistent between all of those sections.

643

01:22:48.330 --> 01:22:59.310

Whitney Quesenbery, Civic Design: And I think especially that sort of opening sentence or two that tells you what the thing is trying to say before it gets into the details, make sure that that's really consistent so it's clear that even though the.

644

01:23:00.510 --> 01:23:10.230

Whitney Quesenbery, Civic Design: The physical way the ballot is laid out might be different on different types of voting systems, the intent of what the rule is saying is to have them be as accessible as possible, thanks.

645

01:23:12.180 --> 01:23:23.250

Kim Alexander: I also, if I could just add one other quick comment in the sacramento county recall ballot, we had it we're all we everybody had the ballot in the mail because we're a vc a county and.

646

01:23:24.180 --> 01:23:36.540

Kim Alexander: The ballot was designed in a way, where it was trial trilingual so there's three quarters of the front page first page was instructions and the recall choice was under a flap at the very bottom of the ballot and had to keep.

647

01:23:37.020 --> 01:23:44.580

Kim Alexander: opening it up all the way to to get to that recall question and then the backside was all the candidates who were on the replacement ballot.

648

01:23:45.480 --> 01:23:54.300

Kim Alexander: And so the bottom of the first page said, make sure you vote the next page, but the second page to say, make sure you voted the first page.

649

01:23:54.300 --> 01:23:54.600

Whitney Quesenbery, Civic Design: And I.

650

01:23:54.870 --> 01:24:00.840

Kim Alexander: kind of felt like it should have said it on both pages, so I just wanted to throw that into the mix is that's why I was saying, if.

651

01:24:00.870 --> 01:24:02.370

Whitney Quesenbery, Civic Design: we're gonna you know that if the.

652

01:24:02.430 --> 01:24:04.620

Kim Alexander: regulations allow for a two sided ballots.

653

01:24:04.860 --> 01:24:08.250

Whitney Quesenbery, Civic Design: yeah maybe all sides should say, make sure you vote both sides yeah.

654

01:24:09.330 --> 01:24:10.770

Whitney Quesenbery, Civic Design: yeah I think that's actually.

655

01:24:18.990 --> 01:24:25.770

Whitney Quesenbery, Civic Design: I think the other question that we've been thinking about sort of more nationally, the the problem that happened in broward county.

656

01:24:26.220 --> 01:24:32.940

Whitney Quesenbery, Civic Design: Only happened in one county because of the an actual in part of the county because of because of the layout.

657

01:24:33.360 --> 01:24:46.290

Whitney Quesenbery, Civic Design: And part of it was that their instructions were in the in the first column and we're quite long and there was only one contest at the bottom and again it got sort of hidden it was big enough that sort of fell off the side of the table of the voting booth tables and.

658

01:24:47.910 --> 01:24:48.450

Whitney Quesenbery, Civic Design: So.

659

01:24:49.560 --> 01:25:00.060

Whitney Quesenbery, Civic Design: I don't know how I would word it, but I, I wonder whether there's something about making sure that the some sort of above the fold kind of.

660

01:25:00.930 --> 01:25:06.660

Whitney Quesenbery, Civic Design: Guidance might be helpful, I don't know how we make that specific enough to be a long way to think about that, but.

661

01:25:07.050 --> 01:25:17.730

Whitney Quesenbery, Civic Design: Making sure that I think there are already some things that try to say don't hide stuff don't don't you know put stuff in a place where it's going to be just overlooked, and this is another case of those and that's a really good example.

662

01:25:18.360 --> 01:25:32.520

Kim Alexander: there's actually one other thing that, of course, came up and maybe you guys have already talked about this, but the issue with the accessibility holes showing the voters choices and the recall that became a big you know social media issue in during the recall so.

663

01:25:33.810 --> 01:25:45.150

Kim Alexander: I don't know if that's appropriate for this committee to look at, but you know for the the counties to consider how once the ballad is folded it will appear inside the return on below and.

664

01:25:45.330 --> 01:25:49.020

Whitney Quesenbery, Civic Design: Because it's not just the accessibility holes are also some other reasons why there's holes and.

665

01:25:49.650 --> 01:25:52.740

Natalie Adona: I don't want to talk about the holes in the bell or in the envelope.

666

01:25:53.310 --> 01:26:03.210

Natalie Adona: Know what's the most annoying thing I mean i'm sorry I know going on public record, but you know we've had the the holes in the envelopes for 20 elections now and all the sudden it's a.

667

01:26:05.550 --> 01:26:17.370

Whitney Quesenbery, Civic Design: Well, so if we do anything I think the answer to that both natalie and Kim might be to make it quite neutral and to say that for vote by mail ballots, the configuration of.

668

01:26:17.730 --> 01:26:23.670

Whitney Quesenbery, Civic Design: The envelope in any holes in the envelope should be you know considered when laying out the ballot or something like that yeah.

669

01:26:27.120 --> 01:26:31.260

Natalie Adona: Because this is something I had a way to know where where that really was, I mean.

670

01:26:31.290 --> 01:26:43.290

Natalie Adona: You know I want to know where the fold is, I want to know where this is and that that is you know, I think that there you know with the you know, specifically with the holes in the envelope, I think that there was some self help that needed to happen.

671

01:26:44.490 --> 01:26:46.920

Natalie Adona: Like you know if if you see a choice.

672

01:26:46.950 --> 01:26:48.600

James Lasby: One way flip it over.

673

01:26:49.860 --> 01:26:50.790

James Lasby: Was it the other way.

674

01:26:51.000 --> 01:26:57.150

Natalie Adona: You know I mean it's fine and there's only so much that we can do I think when we're designing.

675

01:26:57.990 --> 01:27:14.550

Natalie Adona: These things I mean we can sort of make adjustments, but you know, at least with a heart system one adjustment that we make to a contest appears on all valid styles, so an adjustment on one ballot style could be you know really messed up on another ballot style.

676

01:27:16.050 --> 01:27:19.080

Natalie Adona: We only have a few days to get these to the printer so.

677

01:27:19.590 --> 01:27:20.700

Natalie Adona: I mean there's there's a.

678

01:27:20.760 --> 01:27:25.290

Natalie Adona: those sorts of considerations to I don't know that I would.

679

01:27:26.370 --> 01:27:30.900

Natalie Adona: want to spend too much time regulating that sort of thing.

680

01:27:32.250 --> 01:27:37.140

Natalie Adona: But you know, maybe SOS separately wants to do it in the green pages and not the white pages.

681

01:27:39.090 --> 01:27:40.140

Solano, CA - John G.: This is not the same thing.

682

01:27:49.260 --> 01:27:52.170

Natalie Adona: Today, thank you, shut up now.

683

01:27:53.400 --> 01:27:59.220

James Lasby: I mean we can define the ballot, to try to avoid the whole, but if the voters don't fold it back.

684

01:27:59.340 --> 01:28:02.340

James Lasby: The same way, then it was all for nothing.

685

01:28:03.660 --> 01:28:05.790

James Lasby: Well, same problem happens when there's.

686

01:28:07.560 --> 01:28:09.270

James Lasby: A barcode on an inner envelope going.

687

01:28:09.270 --> 01:28:19.830

Whitney Quesenbery, Civic Design: into an outer envelope, which happens on the east coast and you don't get the barcode in the right place behind the whole so it's not just it's not just revealing choices and so making sure that your ballot gets back, and I suppose.

688

01:28:20.970 --> 01:28:28.770

Whitney Quesenbery, Civic Design: I mean I kind of think I agree that we shouldn't put I wouldn't put too much in regulation because these things change, but I think.

689

01:28:29.550 --> 01:28:41.850

Whitney Quesenbery, Civic Design: I take it, green is his Secretary state advice, rather than legal code or guidance from legal code, but I think guidance might be helped voters pack up their their their ballot so that.

690

01:28:43.260 --> 01:28:45.810

James Lasby: Nothing is revealed that gets home fine and.

691

01:28:45.900 --> 01:28:47.550

James Lasby: everything works lovely but.

692

01:28:48.420 --> 01:28:52.080

Whitney Quesenbery, Civic Design: I assume I assume that, to the best of its ability already doing that.

693

01:28:56.880 --> 01:29:02.040

Taylor Kayatta: Are we talking statute versus regulation is that what you mean by green pitches yeah so that would still be law them.

694

01:29:02.460 --> 01:29:02.820

Okay.

695

01:29:12.030 --> 01:29:20.790

REINA MILLER: So with that any other comments or agenda items for next time we also need to figure out when next time will be so, if I could take some.

696

01:29:21.750 --> 01:29:36.360

REINA MILLER: couple minutes to discuss that actually I don't think we have anything on the calendar before we were doing monthly I don't know if that's something we would like to do again, or maybe this every tomb I think we took a two month.

697

01:29:37.410 --> 01:29:40.770

James Lasby: Time in between, to discuss in the working group worked for you guys.

698

01:29:41.700 --> 01:29:43.080

REINA MILLER: i'll take off from what.

699

01:29:43.470 --> 01:29:43.650

What.

700

01:29:55.410 --> 01:29:58.860

REINA MILLER: about every two months anyone disagree with that.

701

01:30:00.240 --> 01:30:11.250

Whitney Quesenbery, Civic Design: No, I was gonna say two months is helpful for the committee process and because i'm starting to see that we have to be able to spend the time cross referencing across sections, to be sure we're getting things right.

702

01:30:12.480 --> 01:30:15.630

James Lasby: And should be more time she'll be pre scheduled.

703

01:30:15.720 --> 01:30:16.110

James Lasby: Maybe due.

704

01:30:16.140 --> 01:30:18.660

REINA MILLER: April and then meet again in.

705

01:30:21.090 --> 01:30:23.310

REINA MILLER: Under June end of August.

706

01:30:24.660 --> 01:30:27.180

REINA MILLER: end of October, if i'm doing the math correctly.

707

01:30:27.240 --> 01:30:29.580

Whitney Quesenbery, Civic Design: Please correct me if i'm going to me to get the end of October.

708

01:30:31.350 --> 01:30:34.470

Raj Bathla: We can rely on June seven that open they're.

709

01:30:36.690 --> 01:30:40.680

James Lasby: busy that day but April April, are we thinking, the.

710

01:30:40.680 --> 01:30:45.960

Victor Chavarin - Kings: 21st or 28th two we like the third week of the month, or the last week or month one or.

711

01:30:45.990 --> 01:30:53.760

Whitney Quesenbery, Civic Design: Winter holidays Monday the 18th is Easter Monday does that affect people's schedules at all, probably not only schools.

712

01:30:55.980 --> 01:30:57.390

Whitney Quesenbery, Civic Design: i'm fine with the 21st.

713

01:30:59.910 --> 01:31:01.860

Whitney Quesenbery, Civic Design: But i'm least i'm working on.

714

01:31:02.610 --> 01:31:05.610

REINA MILLER: 21st 21st at.

715

01:31:05.610 --> 01:31:09.180

James Lasby: 230 not work for anyone on the committee, maybe I should ask it that way.

716

01:31:11.370 --> 01:31:12.840

James Lasby: But he minus 47.

717

01:31:16.020 --> 01:31:17.730

REINA MILLER: So everyone to know things.

718

01:31:21.720 --> 01:31:23.250

James Lasby: Can we do the next week sorry.

719

01:31:28.710 --> 01:31:29.490

James Lasby: i'm sorry which thing.

720

01:31:31.410 --> 01:31:32.430

James Lasby: yeah please.

721

01:31:33.630 --> 01:31:36.540

James Lasby: 28 to 30 words not work for anyone.

722

01:31:44.250 --> 01:31:46.170

James Lasby: Okay, so April 28.

723

01:31:47.790 --> 01:31:48.570

James Lasby: To 30.

724

01:31:51.450 --> 01:31:53.400

James Lasby: And when does when his campus after in.

725

01:31:53.400 --> 01:31:54.690

Whitney Quesenbery, Civic Design: June and just transition.

726

01:32:00.840 --> 01:32:01.380

James Lasby: So.

727

01:32:02.520 --> 01:32:04.200

James Lasby: That we should not meet in the middle of campus.

728

01:32:07.980 --> 01:32:10.500

Joanna Francescut - shasta: Last week in June as well before about fourth of.

729

01:32:16.380 --> 01:32:17.070

REINA MILLER: June 30.

730

01:32:17.490 --> 01:32:19.110

Joanna Francescut - shasta: And 30 yeah.

731

01:32:21.000 --> 01:32:23.190

REINA MILLER: that's June 30 not what for anyone out.

732

01:32:30.810 --> 01:32:35.550

REINA MILLER: Okay, so June 30 230 and how about August 25 at.

733

01:32:35.550 --> 01:32:47.400

James Lasby: 230 Okay, and what did we say about October with the noaa.

734

01:32:51.900 --> 01:32:53.550

James Lasby: You really want to hold a committee meeting.

735

01:32:54.300 --> 01:32:55.440

James Lasby: days before the election.

736

01:32:59.910 --> 01:33:02.220

Joanna Francescut - shasta: I say no for October let's try to get.

737

01:33:03.750 --> 01:33:04.860

Joanna Francescut - shasta: Changes done my.

738

01:33:07.740 --> 01:33:10.770

James Lasby: Secretary state, you need to find a writer.

739

01:33:11.070 --> 01:33:12.450

Whitney Quesenbery, Civic Design: live in August right yeah.

740

01:33:13.470 --> 01:33:13.860

yeah so.

741

01:33:16.380 --> 01:33:18.030

Whitney Quesenbery, Civic Design: I mean, I think we're close enough that we could.

742

01:33:18.540 --> 01:33:23.340

Whitney Quesenbery, Civic Design: Imagine that we might even get done by by June, if not by August.

743

01:33:26.910 --> 01:33:30.960

James Lasby: I mean we're we're we're getting down to little little changes, and I think if we do.

744

01:33:31.620 --> 01:33:37.260

Whitney Quesenbery, Civic Design: A run through the code looking for consistency issues that's not going to make they're not going to be things that will.

745

01:33:37.260 --> 01:33:42.270

James Lasby: need a huge amount of discussion, unless we discover some real challenge where we've broken something.

746

01:33:42.720 --> 01:33:45.420

Whitney Quesenbery, Civic Design: badly by changing the word somewhere else.

747

01:33:46.830 --> 01:33:49.890

Whitney Quesenbery, Civic Design: But it's a good way to find out before we propose this legislature.

748

01:33:54.090 --> 01:33:54.420

Whitney Quesenbery, Civic Design: State.

749

01:33:54.840 --> 01:33:56.520

REINA MILLER: will meet people 28.

750

01:33:56.580 --> 01:33:58.740

James Lasby: To 30 June 30 to 30.

751

01:33:58.800 --> 01:34:01.350

James Lasby: August 25 230 and then.

752

01:34:01.410 --> 01:34:11.010

REINA MILLER: On August will we'll see if we need any additional or we will plan, then, and then I will reach out to the working group to schedule in between meetings so.

753

01:34:11.580 --> 01:34:19.740

REINA MILLER: Please look out for that email, but I think, for now, unless anyone has any questions or comments we can go ahead and end the meeting for us to.

754

01:34:20.790 --> 01:34:24.690

REINA MILLER: Thank you all for joining us today I know we went a little over, but we really appreciate your time.

755

01:34:27.180 --> 01:34:29.220

James Lasby: Thank you, thank you.

756

01:34:29.880 --> 01:34:30.000

Thank.

757

01:34:31.740 --> 01:34:32.310

Robbie Anderson: You them away.
