Method used to choose precincts and batch of ballots to manually tally (include description of random selection method):

Identically sized slips of paper were created with each vote-by-mail (VBM) ballot batch printed on it. All slips were placed in a box with a hand-sized hole cut out and various members of the Registrar of Voters staff pulled 5 batch slips out, and each slip was established as a batch to be in the manual tally for VBM batches. The same process was conducted for the random draw of precincts. The initial precinct draw did not include the measure in Rohnert Park, so the precincts containing that measure were put in a box, and a precinct was randomly selected to be included in the precinct manual tally.

Description of any discrepancies noted (include details about each discrepancy and how each was resolved; also include anything unusual observed during the manual tally process or anything that may improve the manual tally process):

There was one discrepancy. One valid write-in vote for Omar Figueroa (Sonoma County District Attorney Recall Replacement Candidate) was not correctly assigned to him by the adjudicator. This was corrected, and the results report was updated to reflect the correct total for that candidate.
