Description of any discrepancies noted (include details about each discrepancy and how each was resolved; also include anything unusual observed during the manual tally process or anything that may improve the manual tally process):

Zero (0) unresolved discrepancies. All manual tally totals matched the system reports.

There were initially variances on four manual tallies, which upon reconciliation, were found to be due to the completion of necessary adjudication in order to recognize voter intent of votes in those batches. Once ambiguous marks, overvotes and write-in votes were adjudicated, manual counts of vote totals matched adjudicated system reports in all cases. There are no discrepancies.
