Method used to choose precincts and batch of ballots to manually tally (include description of random selection method):

Precincts were selected by rolling a red 6-sided die, white 10-sided die, and blue 10-sided die. Observers and staff in attendance took turns rolling the dice which were read in red-white-blue order until two precincts within range were selected. Vote-by-mail batches were also selected at random using the red 6-sided die, white 10-sided die, and blue 10-sided die. Red to select the tabulator (1 through 5) and the white and blue dice to select the batch number for that tabulator. The dice were rolled and read in the red-white-blue order until 4 batches within range were selected. ROV staff selected 17 additional precincts to cover 40 contests not covered by the randomly selected precincts and 3 vote-by-mail batches to cover 12 contests not covered by the randomly selected batches.

Description of any discrepancies noted (include details about each discrepancy and how each was resolved; also include anything unusual observed during the manual tally process or anything that may improve the manual tally process):

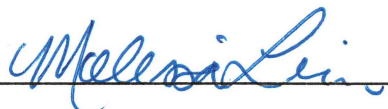

There are two differences between the machine and manual tally:
- Presiding Justice, Court of Appeal, 2nd District, Division 5 (Laurence D. Rubin). The oval for Yes was filled while the No oval was partially filled. The adjudication team interpreted the contest as overvoted (machine tally) while the manual tally board interpreted voter intent as a Yes vote.
- City of Pismo Beach, Councilmember, Vote for 2. Ballot was marked with two choices but crossed out their vote for one candidate. Since only two ovals were filled, the contest was not overvoted and therefore not seen by an adjudication team. The manual tally team did not count the crossed out vote resulting in 32 votes for the candidate vs. the machine tally of 33.
