If the percentage of votes from the random precinct is less than 2% of the total votes cast, a second precinct may be randomly drawn to increase the scope of the audit. In addition to the one percent count, the elections official shall, for each race not included in the initial group of precincts, count one additional precinct. The manual tally shall apply only to the race not previously counted.

Description of any discrepancies noted (include details about each discrepancy and how each was resolved; also include anything unusual observed during the manual tally process or anything that may improve the manual tally process):

One discrepancy occurred during the manual adjudication process; one ballot that required human evaluation to determine the intention of the voter was decided upon by the members of the Adjudication Board differently than the members of the Audit Board. All results of the audit confirmed no errors occurred in the scanning tabulators or the system tallied/reported votes.

INDEPENDENCE, CA – Danielle Sexton, Inyo County Clerk, announces that Inyo County will conduct a Risk Limiting Audit (RLA) in addition to the required 1% post-election manual tally of the ballots cast in the June 7, 2022, Statewide Direct Primary Election to provide transparency of the election process.

The RLA is an audit process that provides strong statistical evidence that the election outcome is correct, or has a high probability of correcting an outcome that wouldn't match a full hand count of the ballots. The audit itself requires human examination to verify more ballots in close contests and fewer ballots in contests with wider margins.

The random selection of 1% of all precincts for the required post-election audit, and the rolling of the 10-sided die for the Risk Limiting Audit, will begin on Tuesday, June 21, 2022, at 9:00 a.m. in the County Elections' office located in the Inyo County Courthouse in Independence.

The RLA process will begin immediately following the random precinct selection for the 1% hand tally and the random seed selected by the rolling of the 10-sided die. The audit is expected to take place from June 21st and 22nd, or until completed.

The Registrar of Voters will publish the election results to be audited, along with a cryptographic hash of their contents on its website.

The public is invited to observe all processes.
