5/29/2022

Internet website where additional information about the manual tally is posted, if applicable:

N/A

Date and time the manual tally commenced, beginning with the random selection of precincts and batches (must be after the close of the polls on Election Day):

6/13/2022 @ 9am

Date and time the manual tally finished:

7/5/2022 @ approx. 9am

Estimated number of members of the public who observed the process:

25

Total number of ballots counted in this election (official canvass numbers):

Polling place / vote center ballots (including provisionals)	9201
Vote-by-mail ballots	104359

Total number of ballots manually tallied:

Polling place / vote center ballots (including provisionals)	66
Vote-by-mail ballots	1314

Precincts in the county for this election (attach list describing all precincts with the number of ballots in each, indicating whether ballots are polling place / vote center, vote-by-mail, or provisional):

Total number of precincts in the election	388 polling place precincts
Total number of precincts selected for the manual tally	6 polling place precincts selected

Batches of vote-by-mail or provisional ballots (attach list describing each batch with the number of ballots in each, indicating whether ballots are polling place / vote center, vote-by-mail, or provisional):

Total number of batches in the election	1124
Total number of batches selected for the manual tally	14 batches selected

Method used to choose precincts and batch of ballots to manually tally (include description of random selection method):

One percent of the polling place voting precincts and one percent of the vote by mail batches were calculated. The precincts and batches were listed in separate reports in randomized order then assigned sequential numbers. Three clear containers with a set a of table tennis balls in each container were used. Each set representing one of three digits: ones, tens, and hundreds. The range of numbers to be determined based on the number of precincts and then the next random draw was based on the number of vote by mail batches. The number of balls to be placed in each container were determined based on the highest digit for each. The balls were displayed for public inspection in a clear container. (see additional page)

*attach additional pages if necessary*

Description of any discrepancies noted (include details about each discrepancy and how each was resolved; also include anything unusual observed during the manual tally process or anything that may improve the manual tally process):

One discrepancy noted. One selection was made and the contest was crossed out. Based on review of the ballot, it was determined that the voter intent was to not vote that contest. The selection would not have been caught by the tabulators and adjudicated. The ballot was duplicated and the batch was reran. Updated report was then confirmed.
