

REPORT OF 1% MANUAL TALLY

[Elections Code section 15360]

County: Marin

Election: March 5, 2024, Presidential Primary

RECEIVED
California Secretary of State
Elections Division

MAR 29 2024

Manual tally method used: One Part [section 15360(a)(1)]

Two Part [section 15360(a)(2)]

Date and time notice provided (attach copy of the notice):

March 11, 2024, Noon

Internet website where additional information about the manual tally is posted, if applicable:

www.marinvotes.org

Date and time the manual tally commenced, beginning with the random selection of precincts and batches (must be after the close of the polls on Election Day):

Monday, March 18, 2024, 10 AM

Date and time the manual tally finished:

Wednesday, March 20, 2024, 2 PM

Estimated number of members of the public who observed the process:

Seven (7)

Total number of ballots counted in this election (official canvass numbers):

Polling place / vote center ballots (including provisionals)	5,858
Vote-by-mail ballots	84,899

Total number of ballots manually tallied:

Polling place / vote center ballots (including provisionals)	242
Vote-by-mail ballots	916

Precincts in the county for this election (attach list describing all precincts with the number of ballots in each, indicating whether ballots are polling place / vote center, vote-by-mail, or provisional):

Total number of precincts in the election	63
Total number of precincts selected for the manual tally	10 batches of vote center ballots that included ballots from 54 precincts

Batches of vote-by-mail or provisional ballots (attach list describing each batch with the number of ballots in each, indicating whether ballots are polling place / vote center, vote-by-mail, or provisional):

Total number of batches in the election	848
Total number of batches selected for the manual tally	13

Method used to choose precincts and batch of ballots to manually tally (include description of random selection method):

We assigned a number to each batch of vote center ballots and vote-by-mail ballots. We then used an online number generator to randomly select batch numbers. We rolled a 10-sided die to determine the number of times to generate the list and then used the final list of numbers to select batches of vote center ballots and batches of vote-by-mail ballots. For example: If we rolled a five, we would generate five lists of random numbers and use the last list to select the batches. Separate lists of random numbers were generated for the vote center batches and vote-by-mail batches. Once we had the random numbers, we retrieved the corresponding batches.

attach additional pages if necessary

Description of any discrepancies noted (include details about each discrepancy and how each was resolved; also include anything unusual observed during the manual tally process or anything that may improve the manual tally process):

Two ballots were read differently during the manual tally from how they were electronically adjudicated.

- 1) U.S. Senate Race partial: Eric Early -- the electronic image was adjudicated as an over-vote and read manually as a vote for Early. (Vote Center ballot counted on Polls-3, in Batch 4)
- 2) Blank vs. Over-vote: The electronic image was adjudicated as blank and read manually as an over-vote. (Vote-by-Mail ballot counted on VBM-3, in Batch 53)

The difference was noted on the manual tally forms.
