Method used to choose precincts and batch of ballots to manually tally (include description of random selection method):

To select the precincts, slips of paper in equal size with one slip per precinct are folded and placed in a wheel and shuffled. A random number is drawn from the wheel by one of the Audit Board Members. The random precinct drawn was confirmed to be at least 2% of the total votes cast (selected precinct = 11% of casted ballots). This validates that only one full precinct is sufficient in size for the full-ballot audit.
