SECRETARY OF STATE**

Precincts in the county for this election (attach list describing all precincts with the number of ballots in each, indicating whether ballots are polling place / vote center, vote-by-mail, or provisional):

Total number of precincts in the election	97
Total number of precincts selected for the manual tally	1

Batches of vote-by-mail or provisional ballots (attach list describing each batch with the number of ballots in each, indicating whether ballots are polling place / vote center, vote-by-mail, or provisional):

Total number of batches in the election	463
Total number of batches selected for the manual tally	5

Method used to choose precincts and batch of ballots to manually tally (include description of random selection method):

The manual tally random sample drawing is split into two voting methods: Vote by Mail (VBM) batches and Polling Place batches. For each voting method the initial draw is 1% of the election night ballot total. The list of polling places numbered from 1 to 51 is used to determine the polling place selected in the random. A random number generator (random.org) is used to select the required number of batches for Poll ballots and a separate random for VBM. The numbers tie to the polling place number or the VBM box (batch) number. A tabulation report is used to determine if the results from tabulation match what was tallied.

*attach additional pages if necessary*

Description of any discrepancies noted (include details about each discrepancy and how each was resolved; also include anything unusual observed during the manual tally process or anything that may improve the manual tally process):

No discrepancies.

*attach additional pages if necessary*

This report is submitted pursuant to Elections Code section 15360(e).
