REPORT OF 1% MANUAL TALLY
[Elections Code section 15360]

County: Ventura

Election: November 4, 2025 Statewide Special Election

Manual tally method used: ☐ One Part [section 15360(a)(1)]

☑ Two Part [section 15360(a)(2)]

Date and time notice provided (attach copy of the notice):

November 5, 2025, 8 A.M.

Internet website where additional information about the manual tally is posted, if applicable:

Vote.VenturaCounty.gov

Date and time the manual tally commenced, beginning with the random selection of precincts and batches (must be after the close of the polls on Election Day):

Random Selection of Batches 11/10/25, 10 A.M. Manual Tally - 11/13/25, 9 A.M.

Date and time the manual tally finished:

11/13/25 at 10:10 A.M.

Estimated number of members of the public who observed the process:

Two

Total number of ballots counted in this election (official canvass numbers):

Polling place / vote center ballots (including provisionals)	24,068
Vote-by-mail ballots	266,852

Total number of ballots manually tallied:

Polling place / vote center ballots (including provisionals)	209
Vote-by-mail ballots	1,815

Precincts in the county for this election (attach list describing all precincts with the number of ballots in each, indicating whether ballots are polling place / vote center, vote-by-mail, or provisional):

Total number of precincts in the election	1,419
Total number of precincts selected for the manual tally	N/A

Batches of vote-by-mail or provisional ballots (attach list describing each batch with the number of ballots in each, indicating whether ballots are polling place / vote center, vote-by-mail, or provisional):

Total number of batches in the election	1,411
Total number of batches selected for the manual tally	15

Method used to choose precincts and batch of ballots to manually tally (include description of random selection method):

Random.org is a random choice generator that is used to determine the batches of ballots that will be used in the manual tally process. 1) A spreadsheet is prepared listing the total number of batches processed. 2) Each batch is then assigned with a sequential number (1,2,3...) This is the sampling frame (the list used to draw a simple random sample). 3) Random.org is then used to select the sample using the sampling frame from Step 2 to conclude the random selection for the 1% manual tally process.

attach additional pages if necessary

Description of any discrepancies noted (include details about each discrepancy and how each was resolved; also include anything unusual observed during the manual tally process or anything that may improve the manual tally process):

No discrepancies noted.
