REBUTTAL TO ARGUMENT AGAINST
PROPOSITION 44

Prop 44 Rebuttal

DON'T BE FOOLED BY SCARE TACTICS.

Highly paid clinic executives want you to believe this measure will close clinics, eliminate services, and hurt patients. Those claims are false.

PROP 44 PROTECTS PATIENT CARE – IT DOESN'T CUT IT.

Proposition 44 simply requires that 90% of clinic revenue be spent on clinics' non-profit mission: patient care and services that support care. This CAN INCLUDE: Transportation, language interpretation, care coordination, community outreach, nurse managers and clinical staff, medical equipment and information technology, and mental health, dental, and preventative care. The opposition falsely claims these services would be cut, but Prop 44 is designed to protect spending that serves patients.

PROP 44 PREVENTS PRECIOUS RESOURCES FROM BEING DIVERTED AWAY FROM PATIENT CARE

Prop 44 seeks to reduce spending on: Excessive CEO pay, lavish events, expensive consultants, and unnecessary administrative spending. That means healthcare dollars would go where they belong: Caring for patients.

WHY ARE CLINIC EXECUTIVES FIGHTING ACCOUNTABILITY?

REBUTTAL TO ARGUMENT AGAINST PROPOSITION 44

The campaign against Prop 44 is funded by the same highly paid clinic executives who benefit from the current system. If today's oversight were enough, some clinics wouldn't be spending less than half of their funding on patient care and services.

The real threat to clinics isn't accountability, it's devastating federal healthcare cuts. Patients can't afford to see precious funding spent on excessive CEO compensation and other non-essentials while they wait months for appointments and healthcare workers struggle with understaffing and limited resources.

PUT PATIENTS FIRST, NOT CLINIC CEOS.

Vote YES on Proposition 44.
