Definitions - Location Types

Vote Center

Vote Centers are defined by the Voter's Choice Act (Election Code 4005) and counties using them have developed election plans reviewed by the public.

Traditional Polling Place

The traditional polling place serves voters based on the address of their voter registration and the Election Code specifies the maximum number of voters a polling place can serve.

Super Consolidated Polling Place

A Super Consolidated Polling Place serves voters based on the address of the voter registration and Executive Order N-67-20 allows an increase in the maximum number of voters served at an individual polling location to 10,000 per voting location.

Super Consolidated Polling Place with Vote Center-like Features

A Super Consolidated Polling Place with Vote Center-like Features serves voters regardless of the address of their voter registration. This option is allowed under Executive Order N-67-20 and enables non-Voter's Choice Act counties to provide services in a manner resembling Vote Centers.
