Proposition 23 is a DANGEROUS, COSTLY MEASURE funded by one special interest group with no expertise in dialysis. More than 100 leading organizations strongly urge: NO on 23.

- AMERICAN NURSES ASSOCIATION\CALIFORNIA WARNS PROP 23 IS DANGEROUS: "Nearly 80,000 Californians with kidney failure rely on dialysis to survive. Prop 23 adds unnecessary, costly requirements that could shut down hundreds of dialysis clinics - dangerously reducing access to care and putting tens of thousands of vulnerable patients at serious risk."

- CALIFORNIA MEDICAL ASSOCIATION URGES NO ON PROP 23: "Proposition 23 would take thousands of doctors away from hospitals and clinics - where they’re needed - and place them into bureaucratic jobs at dialysis clinics where they aren’t. Prop 23 worsens our physician shortage and would make us all wait longer to see our doctors."

- DIALYSIS PATIENT CITIZENS, A PATIENT ADVOCACY ORGANIZATION REPRESENTING 28,000 PATIENTS: "Prop 23 threatens access to care, putting dialysis patients at greater risk of death for missed treatments."

- NAACP CALIFORNIA: "Kidney disease disproportionately affects people of color. Prop 23 hurts minority patients and those in disadvantaged communities the most."

- CALIFORNIA TAXPAYER PROTECTION COMMITTEE: "Prop 23 would increase health care costs by $320,000,000 annually. This massive increase would hurt Californians already struggling financially."

PROP 23 MAKES NO SENSE

Each dialysis patient is already under the care of their own kidney doctor. And dialysis treatments are administered by specially-trained dialysis nurses and technicians. Furthermore, the
federal and state governments extensively regulate dialysis clinics and California clinics
outperform other states in clinical quality.
